Model: WBB297776

3M™ Scotch-Brite™ High Strength Disc 6" x 1/2" Aluminum Oxide A VFN

★★★★★ (0)

Ships within 1 Business Day

Product Description

Conformability allows the Scotch-Brite™ High Strength Disc to work well on irregular surfaces and into tight areas without damaging the base material. This disc may be used individually or stacked on a straight shaft tool or bench motor to condition larger areas, bar grates, louvers, vents, and tracks. Scotch-Brite™ is a unique surface conditioning product with abrasives incorporated into non-woven nylon fibers. Combining abrasives with the fibers creates an abrasive system that delivers consistent results for the life of the product. The open-web material is load resistant and keeps the abrasive minerals cutting at high performance by limiting clogging of the nylon fibers.

Applications are Cleaning, Coating Removal, Contour Finishing, Deburring, Finishing, Weld Cleaning.

Industries Include Aerospace, General Industrial, Marine, Metalworking, MRO, Transportation & Heavy Equipment.

Specifications

Weights & Dimensions

Center Hole Diameter	1/2 in
Diameter	6 in

Product Details

Max RPM	4000 rpm
Color	Red
Series	HS-DC
For Use With	Adhesives, Coatings, Sealant Corrosion Removal, Blending/Deburring, Cleaning
Tool Compatibility	Backstands
FOD	0819042
Manufacturers Part Number	7100096111
Grade	Very Fine
Abrasive Material	Aluminum Oxide
Product Type	Disc, Regular Attachment
Brand	Scotch-Brite
Trademark	Scotch-Brite™
