Ships in 7 Business Days

Product Description

Reinforced with fiberglass for increased durability the Fiberglass Reinforced Cut-Off Wheels are ideal for slicing, cutting, grooving, and trimming a variety of materials including hard and soft metals, marble, drywall, and plastic. The cutting discs feature a 1-1/4 In. (31.8 mm) diameter and 1/16" (1.1 mm) thick blade, and can be used to cut or slot bolts, screws, sheet metal, thin wood and plastic. The 426B includes 20 cut-off wheels which are stored in a speed feed dispenser.

Features:

- Material - Fiberglass
- Reinforced fiberglass cut-off wheels for increased durability to cut, trim and groove into a variety of metals including hardened steel
- Ideal for easily cutting or slotting bolts, screws or sheet metal, thin wood, ceramic and plastic
- Quick dispense system for easy access to your next cut-off wheel
- Includes 20 genuine high quality Dremel® 426 fiberglass reinforced cut-off wheels
