Bi-Level Refrigerated Bottle Filling Station, Filtered, by Global Industrial™

★★★★★ (3)

In Stock, Ships in 3-4 days

Product Description

✓ Includes a comprehensive PFAS & microplastic filter
✓ Install the lower fountain on the left or right side
✓ Secure keyed access door for filter changes & maintenance

Provide cold & filtered hydration with this wall-mounted Global Industrial™ Bi-Level Refrigerated Filtered Bottle Filling Station. The included 3,600-gallon capacity PFAS and microplastic water filter installs with just a 1/4-turn without tools and is engineered to filter

total PFAS (PFOA+PFOS, PFNA, PFHxS & PFHpA reduction) with NSF/ANSI 42, 53, & 401 compliance. The unit's display counts the number of disposable single-use plastic bottles saved from waste and has LED bars that flash to alert when a filter change is required

This bottle filling station features a built-in sensor that dispenses water into bottles at a fast 1.0 GPM fill rate with a completely touchless experience. For those without a bottle, the easy-touch front and side push-bar controls can be pressed by the forearm or elbow to dispense water from the flexible safety bubbler. A second drinking fountain, set a lower height, can be installed on the left or right side depending on preference, to make it easier for children and those in wheelchairs to more easily reach. Limited 5-Year Compressor Warranty.

- 8 gal/hr chilling capacity
- Textured, rust-resistant graphite gray ABS plastic base & brushed stainless steel pan
- Quick turn valve allows unit to be used for bottle filling only
- Bottle filling station is designed to remain on the right side only
- Requires 115V AC @ 60Hz electrical connection
- Patented and other patents pending
- ADA-compliant & NSF-certified
- For indoor use only
