Global Industrial™ Teardrop Pallet Rack Backstop, 96" L, 6" Offset

★★★★★ (0)

In Stock, Ships in 3-4 days

Product Description

✓ Prevents forklifts from pushing pallets too far within your racking system
✓ Piston lock at each end for easy installation
✓ 6" offset maximizes safety & helps protect walls from damage

Keep pallets and loads properly positioned within your racking system with the 96"L Global Industrial™ Teardrop Pallet Rack Backstop with 6" Offset. Made from durable steel, this backstop acts as a physical barrier that prevents push-through accidents and protects

personnel from injury. The 6" offset creates additional clearance between stored loads and the back of the rack to help minimize wall damage while maintaining the space needed for proper sprinkler coverage. It features a piston lock on each end that attaches to Global Industrial™ Pallet Rack Uprights without hardware for quick, easy installation.

- Installs 12" from the top of the support load beams
- Ideal for use in warehouses and other industrial facilities
