Solutions For A Cleaner World

New Biax Meltblown Sorbent Technology
Highest Quality in the Industry
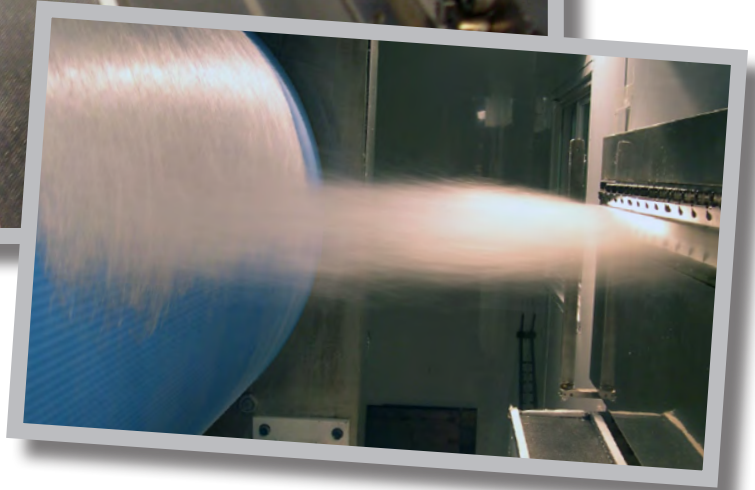

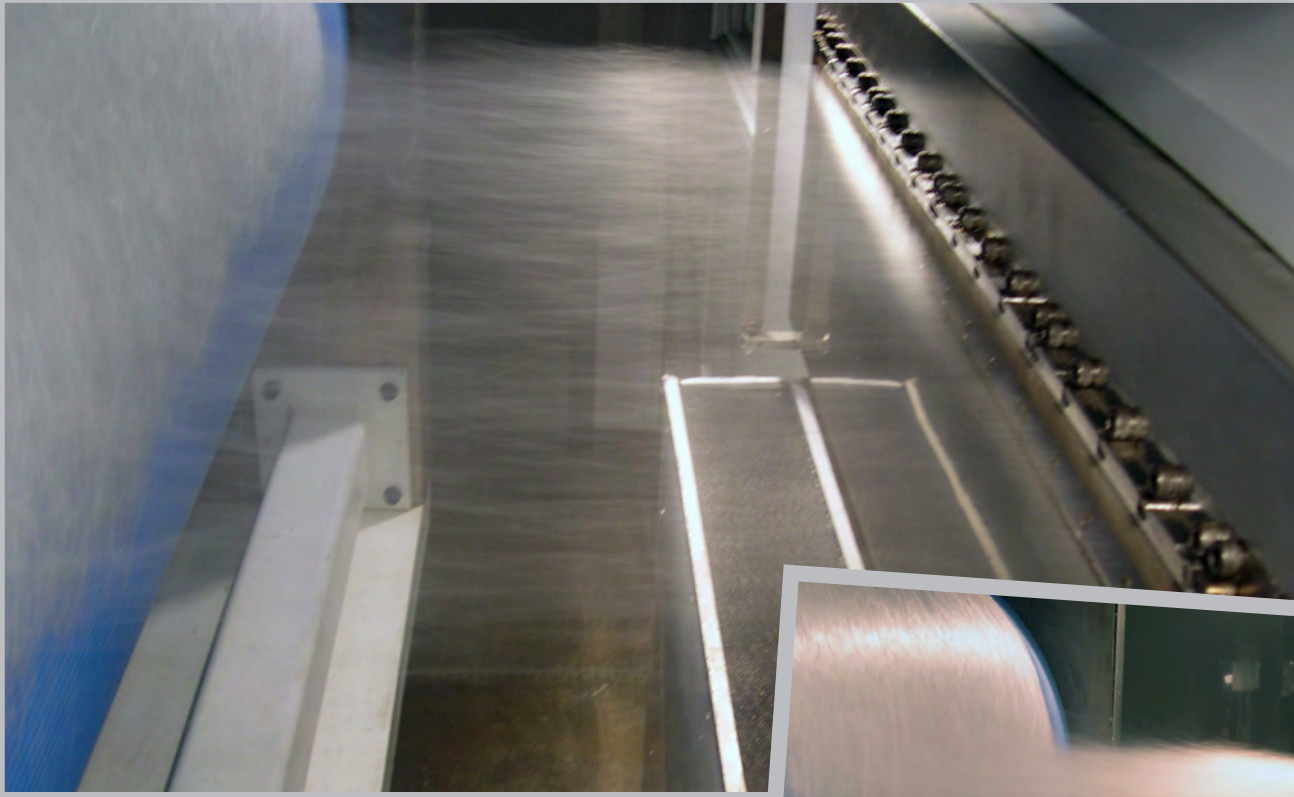

Thank You for taking the time to read through Complete Environmental Products, Inc. (CEP) new environmental and safety catalog. As you browse through the CEP "super center" for spill and emergency response products, we hope you are impressed enough to allow us the opportunity at earning your business.

Many new and exciting changes have taken place at CEP. We have just finished our recapitalization of our manufacturing facility. This facility is now equipped with the newest high tech melt-blown equipment in the industry. Two new 60" biax machines with dual drum capability allow us to produce the finest sorbent materials in the marketplace. We continue to take pride in being the only sorbent manufacturer that produces under the ISO quality management system. To our customer, this guarantees the highest quality of material, on time, every time. If you haven't looked at CEP sorbent products lately, please take a moment to request a **sample pack**. Our production capabilities are now quite impressive.

Since 1994, CEP has helped thousands of distributors grow their business by providing the industries most innovative environmental products. From serving the largest integrated national suppliers down to the local one man shops, CEP has provided environmental

and safety solutions for any application. We pride ourselves in becoming the environmental solution to our customers.

Our Employees are dedicated to personal attention and quality customer service. Call our customer service center at **800-444-4237** and talk with an experienced person, not a machine. **Get same day shipments and 24 hour service.** Please visit our website www.cepsorbents.com as we have a new video section for training and updates. As you browse the catalog and website take note of the "New" products available. Several of these products are solutions to new regulations and your customers will be in need.

Thank you for your business and the opportunity of becoming your **complete** supplier of **environmental products.**

ORANGE POWER PAD

Product Code	Description		
CEP-OPP15	Universal Absorption Pads with Citrus Fragrance	15" x 15"	85/cs

HQ HIGHEST QUALITY   **CEP ONLY**

ORANGE POWER!
UNIVERSAL ABSORPTION PADS WITH CITRUS FRAGRANCE

Completely Safe! Orange Power™ is non-toxic, non-hazardous, and non-flammable. Real anti-static protection that leaves no residue and is low linting. These easily rinsed and reusable towels perform like cloth.

Tackles isopropyl alcohol, MEK and other tough solvents without falling apart due to its powerful solvent resistance.

Superior wet and dry cleaning performance.

High intrinsic surface per unit mass of fiber providing excellent dirt pickup.

Orange Power™ high capacity absorption pads effectively remove general dirt and grime, greases, some inks, tar, asphalt, oils, lubricants, water-based paints, industrial carbon and other heavy-duty soils. The formula leaves your hands smelling clean and fresh.

This disposable, soft, high strength pad is ideal for cleaning hard, non-porous surfaces and can be used anywhere including, but not limited to, industrial manufacturing facilities, auto shops, aviation facilities, medical offices, hospitals, hotels, schools, day care centers, restaurants, nursing homes, correctional facilities, etc.

ABSORBS UP TO 25X ITS WEIGHT IN LIQUID!

CHEETAH SORB

Product Code	Description	
CEP-TS20	Cheetah Sorb Absorbent	20 lb. bag

Give your oil absorbent "Cheetah Power!"

Many new oil absorbent technologies have come and gone. The #1 reason for market failure is simple: Price! Traditional clay based absorbents are dusty, dirty, absorb very little, and have respiratory drawbacks for the low price of the bag.

Introducing CHEETAH SORB! The first new oil absorbent that is dust free, highly absorbent, incinerable, and… priced like floor dry! Cheetah Sorb even looks like floor absorbent, without the harmful silica. Don't make price be the reason you handle the most cost consuming absorbent in the market. Lower your handling costs and get the "Power of the Cheetah", at kitty litter prices!

Cheetah Sorb — the only industrial floor oil absorbent you'll need!
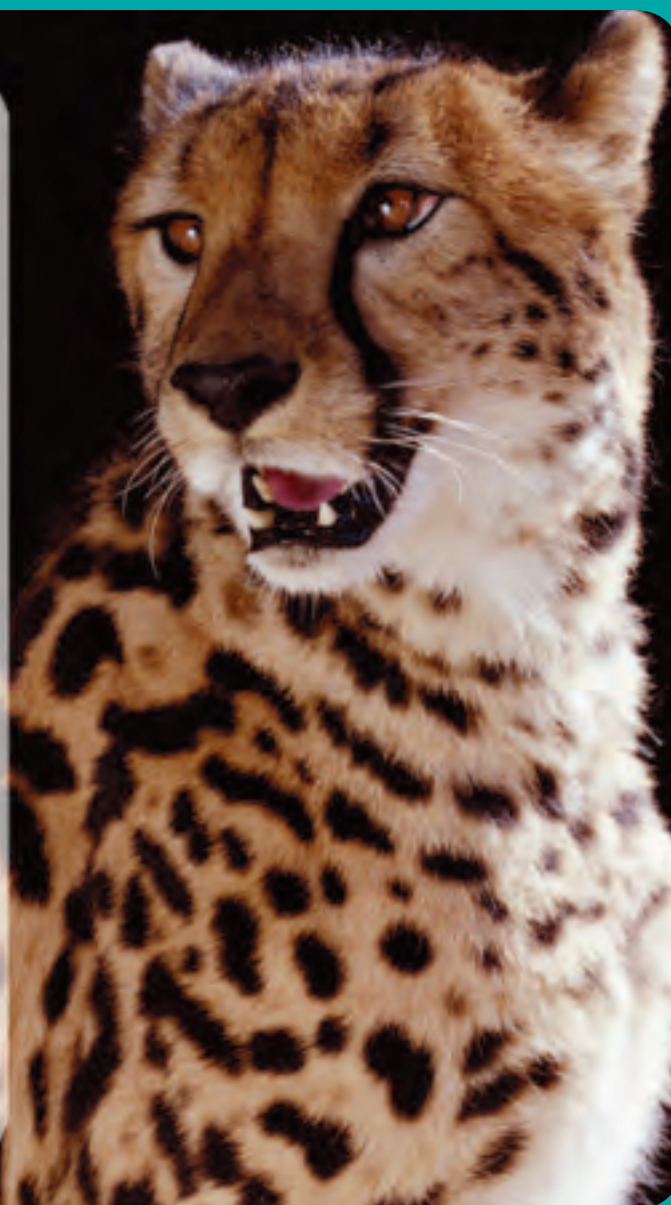

SPHAGNUM PEAT MOSS ABSORBENTS

Product Code	Description	
CEP-PEAT2-P	Peat Moss	3 cu. ft. bags

The CEP organic heat treated peat moss is a hydrophobic, biodegradable granular that absorbs 15 times its weight in hydrocarbons. It contains less than 5% moisture, making this one of the best absorbents on fine sheens or concrete stains.

Peat moss is non-toxic and all natural.

CEP-5391-BK	Super Shipper Poly-Grate Frame IBC	76" x 76" x 20"	85 lbs.	385 gal.	6,000 lbs.

Made in the USA

Excellent containment for top-loading totes, IBCs can be placed directly onto removable steel or poly-containment stand for instant use! These ship-friendly and 2-way forklift entry units provide maximum durability with ultimate chemical compatibility. The movable, easy-to-assemble stand can be lifted for quick access to the spill sump for maintenance, cleaning and decontamination.

Unique engineered design allows sumps to nest within 2" of each other for optimal, economical storage & shipping results. Ship more product in less space!

Platform options include:

Steel – Compact frame construction gives superior load support with reliable compatibility.

Poly-Grate - Link & lock layout allows platform breakdown for storage and shipment with minimal space.

5393-BK-SUMP					
5394-BK-SUMP					

Made in the USA

The Super Shipper Cross-Contain spill pallets offer the lowest platform, highest containment structure available for up to 4-drums. Dynamic low profile designs allow for easy dispensing, filling and pumping.

The open sump grate configurations promote easy inspection and direct access to spills without needing to move the drums. Placing weight on the internal platform and not the sump walls allows the units to store 6,000 lbs with a spill capacity of up to 85 gallons. Maintain productivity while satisfying government regulations with these compact and economical units!

2-Drum – Low profile design keeps drums 6" off the floor for efficient access and use of drums.

4-Drum - Wooden transport pallets become 'removable platforms' and help to reduce drum and product handling.

CEP-1124   Expansion Tank Only, 61" x 31" x 12 1/2", Capacity: 65 gallons, 30 lbs

- New Ultra-Modular IBC Spill Pallets provide low cost spill containment for multiple IBC tanks. Standard offerings include: 2-tank, 3-tank, 4-tank and 5-tank indoor and outdoor models. In addition, components may be purchased separately to allow users to "build-your-own" configurations for indoor models.
- Each IBC tank sits on a heavy-duty spill pallet that offers a Uniformly Distributed Load Capacity of 9,000 lbs. Each of the low profile spill pallets has a containment capacity of 75-gallons and measures 62" x 62" x 8.75"H.
- To increase containment capacity, a 65-gallon capacity Expansion Tank is available. "Flow-through" bulkhead fittings (1.25-inch diameter) are used to connect spill pallets and Expansion Tanks together. This patented feature allows spills to be channeled throughout the containment system, thereby "borrowing" containment capacity from adjacent spill pallets and Expansion Tanks.
- Any number of the modular spill pallets can be connected together with the bulkhead fittings. Two (2) bulkhead fittings are used to connect one pallet to the next.

- Connecting an Expansion Tank to a spill pallet also requires two (2) bulkhead fittings. Bulkhead fittings are included with each 2-, 3-, 4-, or 5-tank model. Once five (5) or more spill pallets are connected together, the total containment capacity is 375 gallons minimum and does not require use of an Expansion Tank to meet the spill containment regulations.
- Optional Extender Kits (Part# 9658) provide for the addition of another compartment to Outdoor Models. (1 tank per Extender Kit).
- Ultra-Modular IBC Spill Pallets are constructed of 100% polyethylene, eliminating the potential for rust and corrosion. They offer excellent chemical resistance to a broad range of chemicals including acids, solvents and oils.

The simplest, easiest way to maintain compliance—and valuable factory floor space.

The versatility of Black Diamond's flexible portable containment meets the durability of our world-known classic spill pallet with the all-new Flexpal™. Our patented designs of the 1- through 8-Drum Flexpal™ units marry a flexible industrial fabric shell with a rigid plastic core. This allows for the most innovative, compliant spill containment on the market. With setup in seconds and pedestal platform support for ample strength, the unique design keeps drums out of the spill and allows easy access to the sump for quick clean-up.

Unlike traditional rigid plastic spill pallets, Flexpal™ can be broken down, stacked or stored when not in use to save on floor and storage space. This same feature gives Flexpal™ the ability to ship in a manageable box that can be shipped small package; saving on freight and transit time!

Available with a drain and perfect for use with the Poly-Ramp™ (5039-BK) to make movement of drums hassle free!

Duck ponds are perfect for projects where storage space is limited. Small enough to fit in a cabinet or store on a shelf, a Duck Pond can hold various drum sizes with ease and affordability. Providing both reliable and reusable secondary containment for oils, fluids, and gasolines; ponds are easy to maneuver and can withstand extreme cold temperatures to -55˚F/-48˚C.

The uses are endless! For quick response to leaking machines, preventative maintenance, and emergency drips, ponds are the perfect quick-grab item that is rugged and ideal for small areas for rapid deployment.

Duck Ponds are available in various sizes, contain a 4" low-profile sidewall, and are leak tested with an unbeatable ENPAC warranty.

- Modular construction allows containment areas of any size to be configured.
- Polymer-coated foam support blocks (6' lengths) provide structure to sidewalls-can be driven over repeatedly without damage.
- Standard materials include 38 mil and 54 mil slip resistant PVC.
- Triangular-shaped, polymer-coated foam support blocks (72"L x 18" W x 6"H) are used with rebar (not included) to provide sidewall structure.

- Molded-in slots in top of foam blocks hold rebar - secures material in place.
- No set-up required once Berm has been positioned in the field.
- EPA 40 CFR 264.175 Containment of Containers Containing Free Liquid.
- SPCC-Spill Prevention, Control and Countermeasure Act.

CEP-BAZOOKA	Imbiber bazooka, 5" O.D. x 12" L	8 lbs.
CEP-BAZOOKA-12 KIT	Bazooka plus installation kit, 5" O.D. x 16.5" L	10 lbs

Introducing an exciting new product, The Imbiber Bead Bazooka! It's an automated shut off system which allows water drainage of containment berm applications, but also utilizes an innovative system for detection of Class I & II organics such as diesel fuel. Water will continually drain through the filter. But, in case of a spill within a berm when an organic substance is detected, the Imbiber Bead Technology takes over , and the flow is completely shutoff. It's a virtually maintenance free design with very simple upkeep.
- Trickle filter allows water flow rate of 20 gallons per minute.
- Unique Imbiber Imbicator pre-filter signals presence of organic susbstance with a distinct color change.
- Imbiber Beads inside capture the organic substance, and by doing so, shut off flow through the filter.
- Virtually maintenance free.

Bazooka Installation Kit. The kit contains all you need for an easy field installation of the Imbiber Bead bazooka, and can be completed in just minutes.

RAIL BERM

Product Code	Description
CEP-45-RSB-FS	Rail Berm, Portable Spill Containment

This new light weight containment pad is designed to provide a temporary bermed containment area around the valves underneath a rail tank car during loading/unloading operations. Light weight (only 38 lbs) it can be easily lifted into place by two operators!

Function: The berm provides a 4'x4' x12" H bermed area that sits in the void between the tracks directly under the valves; should a large release occur, captured product would begin to fill this berm; the spilled product would then be directed over the outside rail to a side compartment 4'x18"x12"H. This outside compartment is fitted with two 2" drains that include male CAM-LOC fittings for quick coupling of system to hoses that can transport the spilled materials to a nearby catchment area.

WARRANTY INFORMATION

Information provided with respect to CEP products is based on testing and data believed to be accurate; however, the reliability of that information is not guaranteed. All sizes in this catalog are nominal. Pad thickness is measured at time of manufacture and used for comparative reasons.

Disposal.
Fluids absorbed by CEP products will not be rendered less hazardous, less toxic, or less flammable and, when absorbed, will remain in their original state. Therefore, handle, store, and dispose of CEP products after use with the same caution as you would the original fluid. Products must be disposed of in compliance with local, State and Federal regulations. Because various fluids absorbed may be of a toxic or hazardous nature, CEP does not recommend disposal procedure.

Exclusion of Warranties.
CEP products are sold without implied warranty of merchantability or fitness for particular purpose, and excluding all other warranties, expressed or implied.

Damages.
CEP is not liable for damages of any type (whether direct, consequential, incidental or special) arising out of or in connection with, the manufacture, sale, delivery, handling or any other use of CEP products. CEP's only obligation is to replace any CEP product proved to be defective.
