EXCLUSIVE BRANDS NEW PRODUCT

Global Industrial™ Plastic Guard Rail Kit, 8'L, Yellow

★★★★★ (0)

In Stock, Ships in 3-4 days

Product Description

✓ Complete guard rail system includes a plastic guard rail and end post designed to help protect personnel, equipment, and facility infrastructure from vehicle impact
✓ ANSI I 9-7 compliant with a 20,000-joule impact rating when installed as a complete system
✓ Durable, flexible, and self-healing plastic resin construction reduces maintenance and replacement costs

The Global Industrial™ Plastic Guard Rail Kit provides a highly visible, impact-resistant barrier solution for warehouses, distribution centers, manufacturing facilities, and other

industrial environments. Featuring durable plastic guard rails and matching end posts, this system is engineered to absorb and recover from vehicle impacts while helping protect people, equipment, racking, and building structures.

Constructed from high-performance plastic resin, the system resists chipping, flaking, corrosion, UV exposure, and extreme temperatures. Its flexible, self-healing design allows components to return to their original shape following impact, minimizing downtime and reducing replacement expenses. The bright yellow finish enhances visibility and workplace safety, while the rubber-based posts provide stability and secure anchoring to concrete floors using the included ground anchors.

Designed for versatile installation, the guard rail system can be configured for straight runs, single-unit applications, and corner layouts using compatible corner posts. When installed as part of a complete system, the guard rail is capable of stopping impacts from vehicles weighing up to 9,000 lbs. traveling at speeds of up to 7 mph.

- Self-healing design recovers quickly after vehicle impact
- Bright yellow finish improves visibility and facility safety
- ANSI I 9-7 compliant with a 20,000-joule impact rating when used as a complete guard rail system
- Helps protect personnel, equipment, machinery, racking, and facility infrastructure
- UV- and freeze-resistant for temperatures ranging from -94°F to 158°F
- Flame-resistant rating: UL94 V2
- Rubber-base end posts provide added stability and secure floor mounting
- Ground anchors included for concrete installation
- Configurable for straight runs and corner applications with compatible posts
- Patent pending
- Limited 2-Year Warranty

Specifications

Weights & Dimensions

Length	86-1/2 in
Height	42 in
Weight	139 lbs
Rail Diameter	6 in

Diameter	6 in
Nominal Length	8 ft
Post Diameter	6 in

Product Details

Assembly Required	Yes
Type	Guard Rail System
Color	Yellow
Material	Resin Plastic
Manufacturers Part Number	B3781704
Impact Capacity	9,000 @ 7MPH
Mounting Style	Bolt On
Component Style	Flexible Guard Rails & Posts
Brand	Global Industrial

Warranty

Warranty	2 yr
