of **hooks**

pewag levo hook LH

Increased efficiency, improved safety and reliability

A new generation of lifting devices

The manual process of attaching and releasing hooks requires a great deal of time and resources. Automation is the key, that's where pewag provides an answer!

The pewag levo hook LH is the all-in-one solution for efficient work processes, worker safety, and satisfied employees. The use of our TÜV-certified levo hook improves the work cycle time while reducing risks to the user and the load.

Thanks to its powerful features, the pewag levo hook LH allows for automated attaching and releasing of loads. It supports operators in difficult working conditions, for instance when working at height or in hazardous conditions.

In the workplace, operator safety should be the top priority at all times. The pewag levo hook LH makes this a reality. Operated by secure radio-control, the levo hook swivels to allow for quick and efficient hook up and release of the load without manual assistance, when equipped with the optional magnet.

Innovative. Reliable. Radio-controlled.

- Reduces manpower, loads no longer need to be attached and removed manually
- Accidental opening of the pewag levo hook is not possible
- Provides operator support when working at elevated heights or underground
- Withstands temperatures that put a strain on the user (-4°F to 140°F / -20°C to 60°C)
- Minimizes hazards and exposure risks from odorless gases, radiation, and other unknown conditions

Safe & Secure (ISO 13849)

Accidental opening of the levo hook under load is not possible, there is a secured communication between the hook and the remote control. Design Factor 4:1 - for reference purposes only

pewag quality

Patented tool-free locking of the rotation lock, tool-free initial mounting, TÜV-certified, pewag know-how

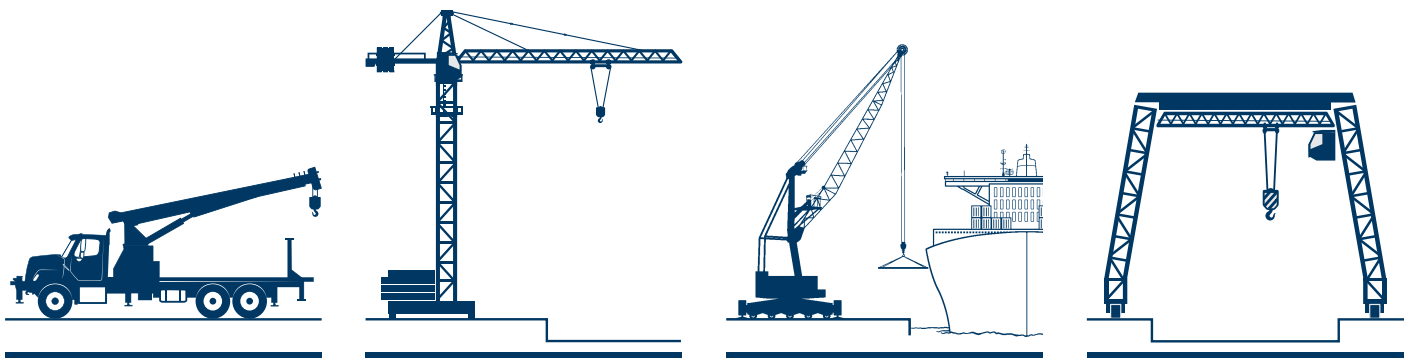

Complete range of services

On-the-job and e-learning training, pewag expert support and repair, USA based

Cost and time savings thanks to expedited work processes

Up to 8,000 operating cycles without a break, hook opens and closes within 2.5 seconds

Basic configuration.

Practical remote

Charging station

pewag levo hook LH 5 tons
equipped with battery, temperature sensor and data logger, peTAG (for clear product identification) and operating manual

Optional equipment.

Magnetic module with sensor
for automatic load pickup

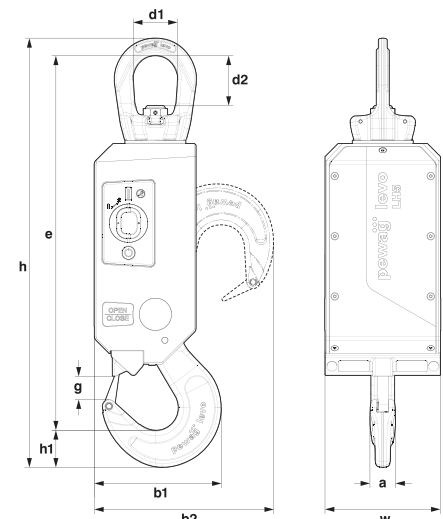

Lighting module
fully illuminates work area

pewag levo manager
comprehensive software
Optional weighing module available

Multiloading Adapter
to operate up to 10 charging stations in one line
