- 17" length x 6" width x 8" height

Warranty

All models of More Power Pullers® include a two-year limited warranty.

Safety

- Safety handle will bend when the rated capacity of puller is exceeded.
- Dual-sided reel and pawl system
- 5/16" cable (rope) size
- Solid one-piece iron components made in USA
- Trouble free one notch at a time let down - up to 4 notches on a light load
- Tried and true, tested design since 1934

ABOUT AMSTEEL BLUE®

More Power Pullers® are now available with Amsteel Blue®, an amazing synthetic rope that is stronger than cable, and so light that it even floats! This is not your typical poly rope – it is constructed of a 12-strand, single-braid, 100% Dyneema® SK-75 fiber with Samthane coating.

- Stronger, yet lighter than cable
- So lightweight it floats
- Totally flexible
- Easy on your hands; it has no wire wickers
- Greaseless
- Impervious to rust or kinking
- Resistant to permanent smashing
- Whiplash-free (does not store energy, cannot whiplash if broken)
- Lightweight – it reduces the overall weight of The More Power Puller®

MODEL NUMBER	CABLE/ROPE LENGTH (single line)	CAPACITY Dead Lift Rating (double line)	CAPACITY Pull/Drag Rating* (double line)	CABLE/ROPE SIZE	WEIGHT LBS
--------------	---------------------------------	---	--	-----------------	------------

CABLE (WIRE ROPE) MODELS (cable size 5/16", 6x37, 222 strand, extra heavy duty flexible fiber core wire rope)

2-20	20 feet	2 ton (4,000 lbs.)	4 ton (8,000 lbs.)*	5/16"	25.2
2-20-SLT	20 feet	2 ton (4,000 lbs.)	4 ton (8,000 lbs.)*	5/16"	25.4
2-30	30 feet	2 ton (4,000 lbs.)	4 ton (8,000 lbs.)*	5/16"	26.8
2-30-SLT	30 feet	2 ton (4,000 lbs.)	4 ton (8,000 lbs.)*	5/16"	27.0
2-35	35 feet	2 ton (4,000 lbs.)	4 ton (8,000 lbs.)*	5/16"	27.6
2-35-SLT	35 feet	2 ton (4,000 lbs.)	4 ton (8,000 lbs.)*	5/16"	27.8
3-20**	20 feet	3 ton (6,000 lbs.)	6 ton (12,000 lbs.)*	5/16"	26.0
3-20-SLT**	20 feet	3 ton (6,000 lbs.)	6 ton (12,000 lbs.)*	5/16"	26.2

OPTIONS: Safety latches (on all 3 hooks). SLT is added to the model number for this option. (Example: 2-20-SLT)

AMSTEEL BLUE® SYNTHETIC ROPE MODELS (5/16" Amsteel Blue® synthetic rope mfg. by Samson Rope)

2-20-A-SLT	20 feet	2 ton (4,000 lbs.)	4 ton (8,000 lbs.)*	5/16"	22.8
3-35-A-SLT**	35 feet	3 ton (6,000 lbs.)	6 ton (12,000 lbs.)*	5/16"	24.2

*Pull/Drag Ratings for comparison only. Winches and a few pullers are rated this way. There are too many variables to determine a scientific drag/pull rating, however, the commonly used ratio is 2:1. Variables include surface type (mud/rocks +), the incline, type of object being dragged, etc. The Pull/Drag Rating is mainly used for an object with wheels (vehicle). ** The 3 ton units are identical to the 2-ton units with the exception of a larger and stronger tackle block hook and stronger handle.

Specifications and weights of the More Power Puller® are subject to change without notice.

Proudly Hand-Built and Made in Newark, Ohio Since 1934

The More Power Puller® has been manufactured by The Wyeth-Scott Company since 1934. **We are proud to state that it is the safest and most durable puller ever made.** **The More Power Puller® is made in the USA.** Our ductile iron castings are made in Pennsylvania and the bulk of our parts are from the USA.

Here at Wyeth-Scott we drill the raw castings, drill hooks, cut cable/rope, install cable/rope ends, install hooks on cable/rope, cut pipe, splice synthetic rope, punch handles, install grips/labels on handles, install safety latches, hand assemble pullers, paint pullers, plus much much more.

There is no other puller on the market comparable to The More Power Puller®. **The components are made of solid, thick iron and steel.** This heavy-duty industrial hand ratchet puller is designed, and has been proven, to perform in a variety of demanding environments without bending, breaking, or collapsing. The heavy-duty cable &/or rope is 5/16" (not 1/4"). Not constructed of lightweight aluminum, our puller is 26 pounds of pure muscle.

Accept nothing but the BEST. Before purchasing from a supplier, verify that the product is "The More Power Puller®" from the Wyeth-Scott Company in the U.S. There is a substandard imitation on the market that adopted a similar name. There is only one puller we manufacture..."The More Power Puller®."

The design of The More Power Puller® hasn't changed much in over 81 years (why change a good thing?). **This puller will last for generations.** We regularly service pullers that are several decades old, and often, all they need is a new cable or spring. We are confident you will find The More Power Puller® to be a reliable, safe and heavy duty tool that will prove to be indispensable.

A 1947 More Power Puller® – still in use!

Maintaining your More Power Puller® is easy to do. We stock a complete inventory of parts for almost any model of the More Power Puller®. See our website or call for a parts pricing list. In addition, we can refurbish pullers, too. Just give us a call to discuss.

The Wyeth-Scott Company is a small manufacturing company located in Newark, Ohio USA. The company started in 1906 making concrete items, and then in 1934 started manufacturing The More Power Puller®. We are now exclusively dedicated to the manufacture of The More Power Puller®.

Wyeth-Scott has been owned and managed by the same family since 1971. Wyeth-Scott is a certified WBE (Women's Business Enterprise) and a WOSB (Woman Owned Small Business). We are not a flashy company. We don't make wild, false advertising claims. What we are is honest, hard-working people that are proud of manufacturing (what we think) is the greatest quality puller ever made. **We take great pride in manufacturing The More Power Puller® and we stand behind our product 100%.** Please call us anytime with a problem or suggestions. A human will actually answer the phone!

The More Power Puller® has hundreds of uses! Some of our customers include:

Industrial and construction workers
4-wheel drive off-road enthusiasts
