# Asset Management

Bishop Lifting Products has partnered with the industry's leading RFID provider TessaLink to deliver an innovative solution that streamlines your inspection, maintenance, certification, and tracking processes. Mobile computing, Radio Frequency (RFID) tagging and internet applications provide enhanced accuracy and operational efficiency to you and your extended team while eliminating most of the paperwork.

Track any type of equipment for certification and maintenance:
Rigging, Valves, Pumps, Tools, Pipe, Vehicles, etc.

1. Cert Check Mobile App – free mobile app
2. Scheduled Reports – create automated reports
3. Cert Book Report – launches last time each asset was certified
4. Cert Map – locate assets where last scanned
5. Reorder Feature – order replacements when items don't pass inspection
6. Special Licensing - offered for more in-depth data management

- Serial Number or Radio Frequency ID (RFID) tracking

- Chips are embedded in items or attached in durable housings

- Accurate, detailed and immediate identification

- Comprehensive web application and database features inspection alerts, certificates, asset history, etc.

- User-customizable inspection forms for any field task

- Schedule inspections, maintenance & repairs automatically

- Streamline digital inventory counts, balances and location tracking

- Online reports alert you to needed repairs or work order data

- Utilized by inspection service teams and end-customers

- Fully integratable to work order and test systems, eliminating data re-entry
