*Things to consider
when choosing a table:*

- What types of procedures will be performed on the tables?
- Are there any ergonomic issues that you face now?
- Are you comfortable with the performance/safety of your present tables with your largest patients?
- What is the budget?

*Contact us for help finding the
best solution for you!*

PHYSICAL THERAPY

- Industry Leading Warranty
- Super Stable Design
- Advanced Ergonomic Top

made in the USA

* Labor on electric tables only.

Translating evidence into practice via ergonomically efficient products.

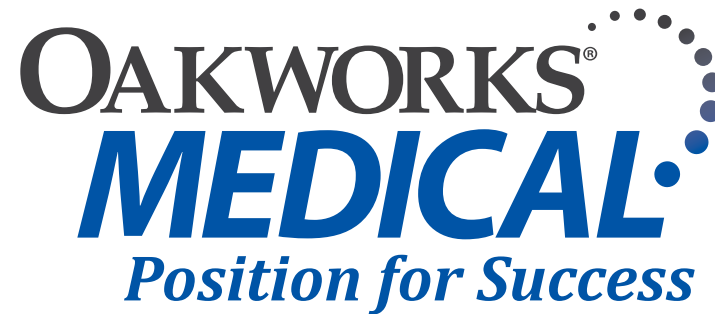

Perfect for...

- PT Clinics
- Rehab Centers
- Private Practice
- Hospital/Medical Centers

Oakworks Physical Therapy tables are designed to create the perfect work surface and hold up to the most challenging environments. The stiff Twin Beam Construction creates a very rigid work surface that takes up less space than cantilevered designs while offering the same ADA compliant height range.

STIFF TWIN BEAM CONSTRUCTION

Stiffer than cantilever designs and with fewer moving parts, our design supports all your work with a 17"-34" height range.
