

⚠ WARNING

Always read and follow the manufacturer's instructions, labels, and warnings before use. Failure to do so can result in serious injury or death. The purpose of the Rescue Pole is to facilitate the connection of a rescue device with a fall victim's full body harness at the sternal or dorsal D-ring. Inspect before each use. Inspect all four components for wear, cracks, other damage, rust, or other corrosion. Remove from service if inspection is failed. Contact FallTech for compatibility concerns.

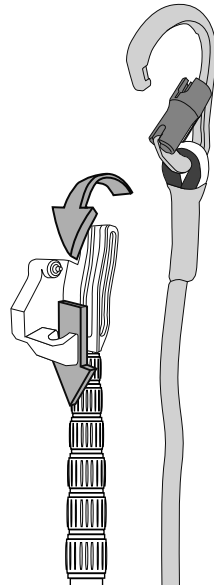

STEP 1

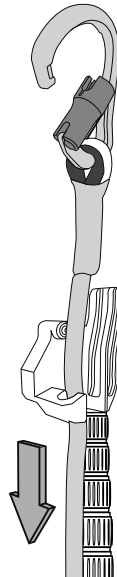

STEP 2

Open Carabiner before installing into Rescue Pole.

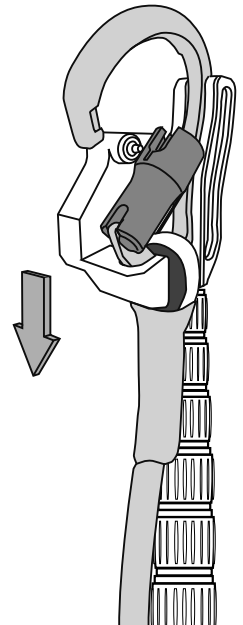

STEP 3

Ensure the carabiner has the correct orientation.

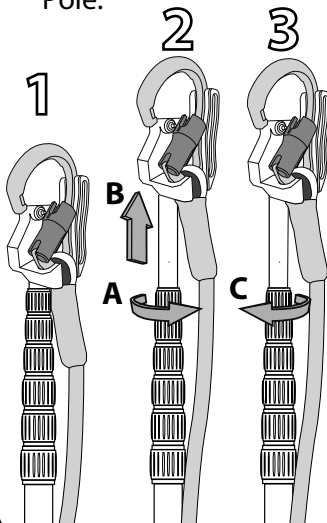

STEP 4

Insert Carabiner until Gate locks into place.

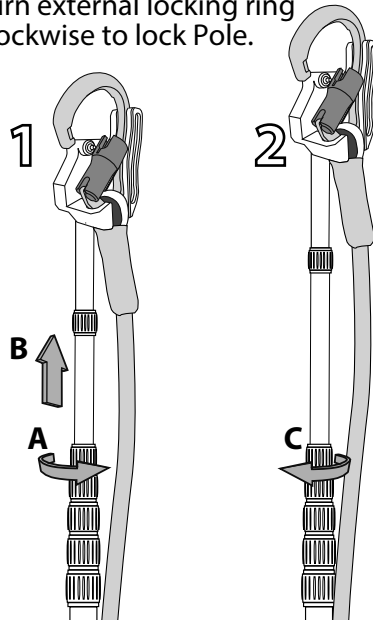

STEP 5

- A:** Turn external locking ring counter clockwise to unlock Pole.
- B:** Extend Pole upward.
- C:** Turn external locking ring clockwise to lock Pole.

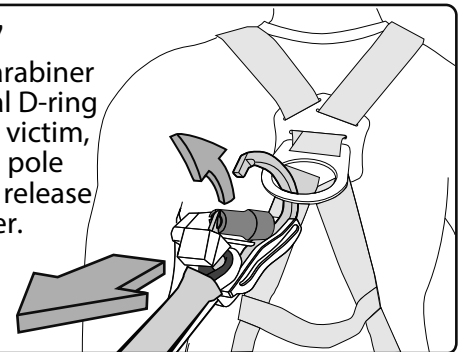

STEP 6

- A:** Turn external locking ring counter clockwise to unlock Pole.
- B:** Extend Pole upward.
- C:** Turn external locking ring clockwise to lock Pole.

STEP 7

Hook Carabiner to D-ring of fallen victim, and pull pole away to release carabiner.

STEP 8

Once Rescue Pole is pulled away, carabiner will close and lock onto D-ring.
