

# Rotating SRL Cradle Anchor 7396

The FallTech® Rotating SRL Cradle Anchor gives you a smarter, safer, and more efficient way to deploy and protect you—and your self-retracting lifelines—on the jobsite.

Precision-built for metal decking, wood roof structures, and other surfaces, this new anchor keeps SRLs elevated, aligned, and easy to maneuver—eliminating drag, reducing wear, and extending service life. With a full 360 degrees of mobility and a low-profile design, it gives you the freedom to move freely and work effectively without compromising your safety.

### Features:

- 10" x 10" anchoring base plate with adjustable cradle that gives you a solid connection point and secure installation.
- 360° swivel rotation allows the lifeline to track with the worker, delivering full freedom of movement without tangling.
- Integrated secondary D-ring attachment point functions as a standalone anchor, offering additional flexibility for personal fall arrest when an SRL isn't in place.
- Rugged, low-profile build with sealed bearings resists corrosion, reduces leverage forces, and extends SRL lifespan.

This anchor installs easily on wood roof structures, steel decking, and Z-purlins. Fully compatible with all FallTech Class 2 SRLs, count on the Rotating SRL Cradle Anchor to keep you safe and productive every step of the way.
