

# EdgeCore™ Web Spreader

Positioning You for Success—  
No Matter the Height

**The EdgeCore™ Spreader is a new companion to FallTech® tower harnesses, designed to enhance your mobility, comfort, and stability at height.**

This innovative and lightweight spreader creates a strong single-point connection for your hip D-rings or bosun seat. The EdgeCore Web Spreader eliminates pinching caused by smaller traditional spreaders, providing a more comfortable and secure fit. Additionally, the new spreader enables seat use for suspension or potential rescue situations.

At the heart of this innovation is EdgeCore—a revolutionary Kevlar®-reinforced synthetic lifeline exclusive to FallTech. This advanced material is stronger than polyester webbing and lighter than steel chains found in traditional spreaders.

With the EdgeCore Spreader, you can ascend towers with less bulk and greater freedom—eliminating the weight and restrictions of heavy spreader hooks.

**The EdgeCore Spreader is available in two versions:**

- Dual aluminum carabiners
- One aluminum carabiner + one choke-on loop

Elevate your ascent with the comfort and protection that you deserve.

**The EdgeCore Spreader will launch with the following part numbers:**

Part Number	Description
8048WS	EdgeCore Spreader with Dual Carabiners
8048WSL	EdgeCore Spreader with Carabiner + Choke-On Loop

**The EdgeCore Spreader complies with the following standards:**

- ANSI Z359.3-2019
- OSHA 1910.140
- OSHA 1926.502

**Below are performance specifications:**

- Static Strength: 5,000 lb min.
- ANSI User Capacity: One user up to 310 lb
