

## 685020

### 20' Assisted Rescue Ladder

- Alloy steel tube reinforced rungs for durable and reliable performance
- Hi-Vis synthetic webbing and reflective tape makes ladder easy to identify, even in dark confined space environments
- Included ANSI Z359.12 attachment carabiner allows for quick and easy install to any appropriate anchorage
- 20' length provides reach to victim including situations such as leading edge foot level anchorage falls
- Hi-Vis Rip-Stop and anti-slip fabric carrying bag facilitates quick deployment and long term protection against the elements
- Easy to use with minimal rescue training required
- For use in rescue applications of conscious and able victims

Reflective Tape
