Comfort Legs Fitment Guide

**Step 1**
(1a.) Place leg straps in a comfortable position toward the mid-point of the thighs. (1b.) Do not move or angle leg straps into a “V” shape near the groin.

**Step 2**
(2a.) Adjust and secure leg straps as needed making sure the (2b.) sub-pelvic strap is positioned correctly below the buttocks.

**Step 3**
(3a.) Fit the harness to the upper body by adjusting the torso straps. (3b.) Be sure the dorsal D-ring placement is correctly positioned between the shoulder blades.

**Step 4**
After the harness has been fitted, make sure you can fit 2 fingers between the leg strap and leg.
