

# HOW TO PREPARE CAKE-CUT TOBACCO

## CHOOSE YOUR TOBACCO

Select a high-quality cake-cut tobacco that suits your taste preferences. There are various types available, with each offering unique flavors and aromas.

## RUB OUT THE TOBACCO

Gently rub the flakes between your palms until they break apart into smaller strands. Be careful not to over-rub, as this can affect the tobacco's burn rate and flavor.

## ALLOW FOR DRYING TIME

Spread the tobacco out on a piece of paper or a dry surface and let it sit for 15-30 minutes to improve its burn and flavor. Avoid drying it too much, as overly dry tobacco can burn too quickly and harshly.

## PACK YOUR PIPE

Start by loosely filling the bowl to the top. Then, gently press the tobacco down with your finger or a tamper until it's halfway full. Finally, add more tobacco to fill the bowl, pressing lightly to ensure an even pack.

## LIGHT AND ENJOY!

Use a match or a pipe lighter to ignite the tobacco, lighting the entire surface evenly. Take slow, steady puffs to enjoy the flavors of the tobacco fully. If the tobacco goes out, gently tamp the ash down and relight as needed.
