

EFFECTIVELY REMOVES BACTERIA AND FOOD PARTICLES FOR HEALTHIER GUMS

ORAL-B® WATER
FLOSSER ADVANCED
deep cleans and detoxifies
below the gumline* with Oral-B's
exclusive **OxyJet™** technology

*Helps reduce plaque bacteria and inflammatory components associated with gingivitis, when used as an adjunct to brushing, flossing, and regular professional care.

DO YOU HAVE UNTREATED GUM ISSUES?

Up to 60% of adults are affected by gum issues¹, which are most often caused by plaque buildup. Left untreated, gum issues can lead to more serious concerns, such as:

BAD BREATH GUM BLEEDING TOOTH DECAY

A WATER FLOSSER CAN IMPROVE GUM HEALTH

A water flosser, like the new **Oral-B Water Flosser Advanced**, is a tool that uses a stream of water to clean interdental spaces and remove bacteria. When used as an adjunct to brushing, flossing, and regular professional care, it can significantly reduce gingivitis.

This tool is perfect for people looking to **improve their daily oral health routine**—especially those with **implants, crowns, braces, gum sensitivities**, or anyone who needs support with their at-home interdental cleaning.

HOW AND WHEN TO USE A WATER FLOSSER

A water flosser should be used in addition to regular brushing and flossing, and can be used either before or after you brush. Simply aim the water stream at the spaces between your teeth and along your gumline, targeting any food particles that might have been left behind.

REACH A NEW LEVEL OF GUM CARE WITH **Oral-B** WATER FLOSSER ADVANCED

OXYJET™ TECHNOLOGY

Water enriched with microbubbles of air helps to improve gum health

PERSONALIZED EXPERIENCE

2 nozzles offer up to 4 stream settings:
