

Automatic Water Dosing Instrument AQiX²

Trust The Flow.

With the AQiX² water dosing device, you can measure the amount of water you need easily and precisely at the touch of a button. Flexible enough to be attached to many buckets and automatic mixers, the AQiX² is easy on your back, saves time on the construction site, and ensures the best mixing result.

Product Features

- Measure water 50% faster.
- Simply connect it to a hose, select the quantity, hang it on the bucket and press play.
- You don't have to haul heavy buckets or measure water by hand.
- Ensure the right amount of water for any mixing material.
- Device is battery-operated and portable. No annoying cable.

Technical specifications

Item No.	Dosing quantity	Flow rate	Power	Connection
19035	1 - 26 gal	2.6 - 6.6 gal/min	2 x AA	3/4 "

Product Benefits

Measure Water 50% Faster

Measure water 50% faster than measuring by hand. Simply connect the AQiX² to a hose, select the quantity, hang it on the bucket and press play. It's designed to do the job for you to save you time and free you up for other tasks.

Consistent Mix

With the AQiX², everyone on the jobsite will always measure the same amount of water. With modern construction materials, precise water dosing is important to maintain product integrity.

Save Your Back

You don't have to haul heavy water buckets. With AQiX², the water comes to you.

Flexible Hose Connections

Simply connect it to a standard $\frac{3}{4}$ " connector, or $\frac{1}{2}$ " garden hose connector. It's compatible with all common automatic mixers.

Portable and Rugged

The portable design fits in the palm of your hand. It's powered by 2x AA batteries to go anywhere. For its protection it comes in a robust carrying case.
