

AIDA Imaging WM-PTZ Wall Mount PTZ

WM-PTZ

Pre-Installation Checks

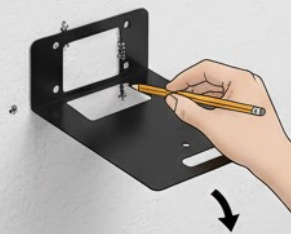

- Choose a solid wall surface able to hold the weight of your PTZ camera + bracket.
- Ensure the location allows for the camera's movement (pan/tilt) without obstruction.
- Check cable routing: the bracket provides two slits for cables to pass through or behind the wall.
- Confirm that the ¼-20 screw aligns with the mounting hole on your PTZ camera.
