

Arkion®

BEETLE SPRAY PLUS FOR POULTRY

COMPETITIVE WITH TRADITIONAL TREATMENTS

Beetle Spray Plus provides outstanding performance and has a cost-per-treatment that is competitive with other natural and synthetic darkling beetle control products.

REDUCES SALMONELLA IN LITTER

A pilot study by a leading poultry research group observed that contaminated litter when treated with Beetle Spray Plus showed "reductions in *Salmonella enteritidis* levels" and was "effective against Salmonella."

KILLS DARKLING BEETLE ADULTS ON CONTACT

Recent laboratory and field evaluations conducted by a leading poultry research university concluded, "Nearly 100% mortality was observed from beetles treated with Beetle Spray Plus..."

DECREASES CHICK MORTALITY

The study by the research group, evaluating Beetle Spray Plus on young broiler chickens, resulted in "improved livability" in the pens treated with Beetle Spray Plus.

KILLS DARKLING BEETLE LARVAE ON CONTACT

In those same university trials, they concluded "We found near 100% mortality of *A. Diaperinus* larvae treated with Beetle Spray Plus..."

INCREASES CHICK FEED INTAKE

This same study evaluating the Beetle Spray Plus on young broiler chickens, resulted in "a significant increase in feed intake in the Beetle Spray Plus treated pens."
