Consistent heat source for farm environments

Maintaining a consistent body temperature in young animals is important for their health and wellbeing. Most animals are unable to regulate their body temperatures when they are born. Using a supplemental heat source like the ONCE Incandescent Heat Lamp helps keep them above ambient temperature and prevents them from getting sick, injured or worse.

ONCE heat lamps feature a shatterproof design, making them well suited for heating in animal applications. They heat immediately, eliminating costly warm-up time, and provides a built-in reflector for radiant energy control.
