

Overdrive Dimmer Controller with MOSFET control provides the finest dimming requirements for low light levels and strong lamp re-ignition. Dual Output channels can run independent lighting schedules which can illuminate or dim two lighting zones simultaneously. It's not only a dimmer but a controller also. For optimum performance and long life, use this dimmer controller with Overdrive dimmable Lamps.

## Product Features

- Dual Output zones can run independent lighting schedules
- 3 Programs - Master, Manual, Slave mode for quick and easy programming
- Kick Start program feature turns lights on to 100% for a 10 minute window and then back to previous Master or Slave mode programming.
- Master Mode - easily set up your lighting programs thru the 24 hour clock with in the dimmer. No controller needed.
- Manual Mode - Keypad control
- Slave mode with 0-10V DC analog voltage control
- Integrated 3" OLED Display
- Fully integrated digital control system for Precise and consistent dimming
- 4kV Surge Protection, Over Voltage Protection, Short Circuit Protection
- MOSFET Control reduces dimmer power loss and runs cooler

| Dimmer Model | Rating     | 6W LED/Dimmer | 10W LED/Dimmer | 15W LED/Dimmer |
|--------------|------------|---------------|----------------|----------------|
| ODMR0210N    | 2 x 10 Amp | 2 x 150 = 300 | 2 x 90 = 180   | 2 x 60 = 120   |
