

Ever wonder why there are differences between Overdrive directional beam angle LED's and an Omni?

Let us show you the why there is a difference and why the Overdrive directional lamps are still the Best Bulbs for the Poultry Industry.

- Growers achieve higher Foot Candles on the floor
- 5 year warranty with an approved Trailing Edge dimmer
- 100% dimming
- Special designed chip allowing more linear dimming than Omni
- Gasket to protect the lamp and keyless
- Constant Current Driver delivers constant lumen even if grid voltage lowers.

vs

- 30% of light is lost on the ceilings and sidewalls
- 2 year warranty with an approved Trailing Edge dimmer
- 70% to 80% dimming
- Omni lamps were designed for household use and are used in ag buildings because of their low price point.
- No Gasket
- Linear current driver – lumens are lowered based on grid voltage
