Rotem Pro

Climate Control Taken to a New Level

The Rotem Pro, Munters' next generation in climate control, provides poultry and swine farmers with vastly expanded capabilities, including climate control, feed and water management, and more. Housed in a user-friendly, easy to install case, the Rotem Pro is suitable for operations of any size, from standard to large farms.

The unit supports up to 200 heavy duty relays, comes equipped with a feature-rich software package, an ARM CPU, SD card reader, smart override switches, independent heat zones, and more. The Pro's enclosure is designed to facilitate installation and maintenance, while a switch guard door keeps toggle switches securely in place.

Remotely manage your farm with the intuitive RotemNet Web, the web based software that allows remote control on any device.
