6) Next, enter 3722 and then press the left option key to Save
7) Next, the following message will appear if the emergency message recipient has not been configured:

   CAUTION! Emergency message recipient has not been configured. Refer to user guide and edit.

8) If this message appears, press the left option key for Edit to program the call recipient.
9) Next, press the left option key for Options
10) Next, press the left option key for Select to Edit the message recipient
11) Next, press the left option key for Select to Edit Number
12) Next, press the right option key for Clear to delete the + sign
13) Next, enter *3 and then press the left option key for OK
14) Next, press the right option key for Back
15) Programming is complete

In the event that the emergency call and message recipients have already been programmed or need to be edited in the future, follow these instructions:

Programming Emergency Call and Message Recipients from the Main Menu
Step 1: Access Emergency Options:
1) Press the left option key for Menu
2) Press the down arrow on the 2-way Navi Key until Setup is highlighted
3) Press the left option key for Select for Setup
4) Press the left option key for Select for Location Options
5) Press the down arrow on the 2-way Navi Key until Emergency Options is highlighted
6) Press the left option key for Select for Emergency Options

Step 2: Ensure Message and Call option is selected
1) Press the down arrow on the 2-way Navi Key until Emergency Actions option is highlighted
2) Press the left option key for Select for Emergency Actions
3) Make sure the Message and Call action is highlighted. If necessary use the 2-way Navi Key.
4) Once the Message and Call action is highlighted, press the left option key for Select

Step 3: Edit the Message Recipient:
1)   Press the down arrow on the 2-way Navi Key until Message Recipient option is highlighted
2)   Press the left option key for Select for Message Recipient
3)   Press the left option key for Edit to program the call recipient.
4)   Next, press the left option key for Options
5)   Next, press the left option key for Select to Edit the message recipient
6)   Next, press the left option key for Select to Edit Number
7)   Next, press the right option key for Clear to delete the + sign
8)   Next, enter *3 and then press the left option key for OK
9)   Next, press the right option key for Back

Step 4: Edit the Call Recipient:
1)   Press the down arrow on the 2-way Navi Key until Call Recipient option is highlighted
2)   Next, press the left option key for Select
3)   Next, press the right option key for Clear to delete any numbers and the + sign
4)   Next, enter 3722 and then press the left option key to Save

Step 5: Return to Main Menu and Completion of Programming
1)   After completing steps 1, 2, 3, and 4, press the right red key to return to the Main Menu
2)   Programming of emergency call and message recipients is complete.

Emergency Response Service setup for all Telstra Customers

Programming Emergency Recipient for Telstra Customer Instructions:

*Please Note: the *3 configuration will not work with a Telstra Satellite Service. Please follow these instructions to configure the Emergency Message Recipient Settings for a Telstra Satellite Service:*

Step 3: Edit the Message Recipient:
1)   Press the down arrow on the 2-way Navi Key until Message Recipient option is highlighted
2)   Press the left option key for Select for Message Recipient
3)   Press the left option key for Edit to program the call recipient.
4)   Next, press the left option key for Options
5)   Next, press the left option key for Select to Edit the message recipient
6)   Next, press the left option key for Select to Edit Number
7)   Next, press the right option key for Clear to delete the + sign
8)   Next, enter 3722 (or +61427006911) and then press the left option key to Save.
9)   Next, press the right option key for Back

By programming the above numbers into your handset, it will allow you to send GEOS your location co-ordinates in an event of an emergency. Configuring the handset to call 3722 will work over the Telstra Satellite Network and no changes need to made to the call recipient during the Geos set-up.
