SCAR WINCHES

When you're looking for the next generation in winching technology focused on performance and adaptability for any recovery condition our new SCAR line winches deliver upgraded performance and power. Each SCAR winch comes with class leading 6.5 Horse Power series wound motor featuring a low DB output. The braking system features a military spec cone built into the motor with automatic engagement system when operating in a forward or reverse pull and provides zero creep and heat. The SCAR winch is optimal for repetitive pulls and ideal for the most extreme recovery scenarios.
