PERFORMANCE WINCH LINE

Introducing the Brute Recovery Performance Winch Line from Overland Vehicle Systems. Our Brute Synthetic Winch Line is designed for those tough winching situations where additional strength and visibility is needed. Featuring a lightweight UHMWPE construction and additional abrasion sleeve for durability. This winch line is made from heavy-duty synthetic reflective fibers. It offers strong durability and good UV / chemical resistance in recovery situations. Upgrade your winch with a stronger sythetic winch rope than traditional steel cables.
