DIGITAL TIRE DEFLATOR

Looking for an easy and accurate way to air down your tires before hitting the trails? Look no further than the digital tire deflator with valve kit from digital tire! This easy-to-use tool quickly and easily screws onto your valve, allowing you to pull back the collar to deflate tire in just seconds. You can then check PSI while deflating by sliding the collar back in - no need for a separate tire pressure gauge! Our large 2" dial is heavy-duty and feels solid in the hand, making it easy to get an accurate reading. Order your tire deflator today! Plus, it comes with a storage bag for easy transport. Order your tire deflator with valve kit today!
