TIPS FOR A LONGER LASTING TENT

- Open the floor slit and be able to sweep out any elements that may get in your tent

- Use cold water and a sponge to wash any stains or dirt from your tent as to preserve the fabric
- Use the floor tarp to keep the bottom of your tent protected from any water or rocks that may scratch your tent

WARNINGS

- **Weather Conditions** – Do not set up your tent in high winds, severe storms, or areas prone to flash flooding. Always secure with stakes and guy lines.
- **Fire Safety** – Never use open flames, heaters, stoves, or candles inside or near the tent. Keep campfires at a safe distance.
- **Ventilation** – Always maintain proper airflow to reduce condensation and avoid buildup of harmful gases.
- **Site Selection** – Do not pitch your tent under dead tree limbs, on unstable ground, or in low-lying areas that may collect water.
- **Anchoring** – Ensure tent is properly staked and guy lines are tensioned before leaving unattended.
- **Animals & Wildlife** – Do not store food inside the tent. Use proper food storage to avoid attracting wildlife.
- **UV & Heat Exposure** – Extended sun exposure may degrade materials. Whenever possible, set up in shaded areas or use a tarp/awning for protection.
- **Children & Pets** – Supervise children and pets around the tent to prevent accidental damage or injury.
- **Storage & Transport** – Make sure the tent is completely dry before storage to prevent mold, mildew, and fabric damage.
