

C-ZLPRO

DC Cable for Canon CINE-SERVO Lens

C-ZLPRO has been created to fulfill the demand for a means to power Canon's CINE-SERVO zoom lenses with cameras that would otherwise not have the ability— due to lacking a DC power supply to the lens.

The C-ZLPRO has a D-Tap plug to HR10-10J-12S connector and is 12.5" long. It allows 12-17V DC to be supplied either directly from batteries such as the ENDURA DUO or CUE series, or from the D-Tap output from IDX ENDURA V-Mount plates.

C-ZLPRO Features:

- Provides DC power via D-Tap to Canon's CINE-SERVO lens
- 12.5" in length provides sufficient length without being cumbersome
- Compatible with all IDX D-Tap (12-17VDC) ports

Technical Specification

Cable assembly:

D-Tap Plug (50W max)
Hirose HR10-10J12S (2A Max)

DC Output:

Hirose: 2A
Pin 3: (-)
Pin 6: (+)

Cable Length:

12.5 inch / 32 mm
