CHORUS
INSTRUCTION MANUAL

SPECS
Vaporizer: 1.06 x 1.89 x 4.45" (27 x 48 x 113 mm)
Mini Hot Knife: 0.43 x 0.48 x 2.74" (11 x 12.3 x 69.5 mm)
Battery: 2000 mAh
Mini Hot Knife: 180 mAh
Temp setting: 490, 510, 530, 570°F
Charging: USB-C

KIT INCLUDES
1x Chorus Vaporizer
1x Carry Case
1x 14 mm Male Water Pipe Adaptor
1x USB-C Charging Cable
5x Alcohol Cotton Swabs
5x Dry Cotton Swabs

CHARGING
Before using the Chorus, fully charge the device using the USB-C charging cable and a standard charging brick. The Chorus will vibrate once to let you know the charging cycle has started, also indicated by the pulsing battery icon. Current battery life percentage is displayed underneath the battery icon. When the battery is drained it will display Low Voltage on the screen, please charge the device.

MINI HOT KNIFE
The Chorus comes with a Mini Hot Knife that docks and charges in the vaporizer housing. To remove, push down on the tab located on the bottom of the device and slide out the hot knife. Scoop your desired amount of concentrate onto the blade of the hot knife. Hover over the middle of the coil and press/hold the button on the bottom of the hot knife until the concentrate is transferred to the coil. The hot knife will not activate if it is docked inside the Chorus.

Note: It is important to clean the blade of the Mini Hot Knife before reinserting it into the Chorus upon each use. If your Mini Hot Knife is sticking, see the Deep Cleaning section below.

ONBOARD STORAGE
The Chorus has a removable wax storage compartment that holds approximately a ½ gram of concentrate. It is located beside the coil, underneath the mouthpiece assembly. The storage compartment is constructed of glass and has a removable silicone sleeve with top cover. When open, the sleeve's top cover attaches magnetically to the Chorus housing for easy refills.

POWER ON/OFF
To turn the Chorus on or off, hold the power button down for 2.5 seconds. The device will vibrate and the signature Pulsar "P" will fade in or out.

TEMPERATURE SELECTION
The Chorus is equipped with 4 preset temperatures. With the device on, you can cycle through the settings by pressing the power button 1 time. The temp setting that you stop on will be the selected setting.

Low: 490°F - Blue
Medium: 510°F - Green
High: 530°F - Yellow
Max: 570°F - Red

CHORUS | INSTRUCTION MANUAL

LOADING CONCENTRATE
Detach the mouthpiece assembly and open the storage compartment. Use the hot knife to scoop your concentrate, then press and hold the hot knife's button to transfer concentrate into the atomizer. Make sure to target the bottom of the coil for best results. Do not place concentrate on the side or rim of the coil. Close the storage compartment and replace the mouthpiece assembly. Slide the hot knife back into the port after cleaning the blade.

USAGE
With the atomizer loaded and the temperature selected, press the power button 2 times to start the 20 second preheat cycle. The device will vibrate once to confirm it is preheating. During preheat, the selected setting will be highlighted with a pulsing light. Once the preheat cycle ends, the device will vibrate again and the screen will change to a 30 second countdown wheel. The device will vibrate when the session ends and the screen will return to the temperature settings menu. You can cancel the session at any time by pressing the power button 2 times.

When the atomizer is not making a successful connection, it will display 'IDLING' on the screen, please remove and reinsert the atomizer.

For best results, spin/toggle the carb cap for higher vapor production.

WATER PIPE ADAPTER
Remove the silicone stopper from the bottom of the device and move it to the side. Do not put additional pressure on the stopper. Insert the water pipe adapter into the Chorus and twist clockwise until it locks into place. Connect the assembly to the water pipe of your choice, then follow the steps above for usage.

CLEANING
Light cleaning: For the best performance and longevity of the coil, we recommend wiping out any excess concentrate with a dry cotton swab, then cleaning the coil with a swab dipped in 91%+ isopropyl alcohol after each use. To prevent sticking, pull the carb cap out of the manifold while it is still warm. Use a cotton swab soaked with 91%+ isopropyl alcohol to clean the outside of the carb cap and the inside of the housing. Let all parts air dry before reassembly.

To clean the water pipe airpath, remove the coil and open the silicone stopper on the bottom of the unit. Use the included alcohol swabs to clean the airpath. Remove any residual moisture with a dry cotton swab.

Deep cleaning: Complete all the steps in the Light Cleaning section above. Detach the mouthpiece assembly from the device, then fully disassemble by pulling the carb cap out of the manifold and removing the silicone mouthpiece's inner housing from the bottom. Unscrew the atomizer and place all disassembled parts (atomizer, carb cap, mouthpiece housing, silicone mouthpiece inner housing) into 91%+ isopropyl alcohol, letting them soak for at least 1 hour or until all buildup has been dissolved. Remove all the parts from the alcohol and wipe off any lingering residue. Allow parts to air dry for several hours to make sure all the alcohol evaporates before reassembly.

Remove the Mini Hot Knife from the base of the Chorus and wipe off any buildup from the blade and body of the hot knife. Use the included alcohol swabs to clean inside the hot knife dock.

PRO TIPS
The carry case has a cut-out that fits most 1 g to 2 g traditional concentrate containers.

WARNINGS
Do not expose to extreme temperatures or direct sunlight. Do not drop the device or accessories. Do not drop or submerge in any liquid. Do not modify the electronics in any way. This device is intended for adults only. Do not sell or provide to minors. Keep all parts, concentrates, herbs, and liquids away from children and pets. This is not a medical device and is not intended to diagnose, treat, mitigate, cure, or prevent any ailment, disease, or other conditions. Consult a physician before use, especially if you suffer from heart disease or any other medical condition, or if you are pregnant or breastfeeding. Failure to follow any of these instructions could result in product damage, property damage, personal injury, and may void warranty. Visit PulsarShop.com for warranty information.
