

Nexa Desire POS

Touch POS Terminal

Overview

Stylish, modern, and with power and connectivity to spare, the Desire POS is a very capable and cost effective POS terminal.

It features a modern, high tech look, that adds to, rather than detracts from a counter. It also now features the option of a low cost, fanless Intel Atom 1.8Ghz CPU, or an Intel Sandy Bridge B960 2.2GHz CPU for demanding applications.

The touch panel is a next generation bezel free touch, so the LCD/touch panel front is completely flat, providing excellent spill resistance and a modern look.
