MATERIALS & CARE

MATERIALS

POWDER-COATED ALUMINUM is both lightweight and extremely durable. The rust-proof nature of the welded powder-coated aluminum frame offers high quality and strength, making it a great fit for high-traffic outdoor environments.

COMPOSITE SLING is a composite mesh fabric woven using PVC-coated polyester threads to create commercial grade material ideally suited to the outdoor environment.

POLYURETHANE COMPOSITE used to create the wheels provides the strength of a rigid plastic without becoming brittle, combined with the flexibility and elasticity of rubber. Cut and tear-resistant, this material has a higher hardness rating and better load-bearing capacity than rubber resulting in outstanding impact and abrasion resistance. Pigment is added to protect against UV damage and eliminate the degradation of material property and color.

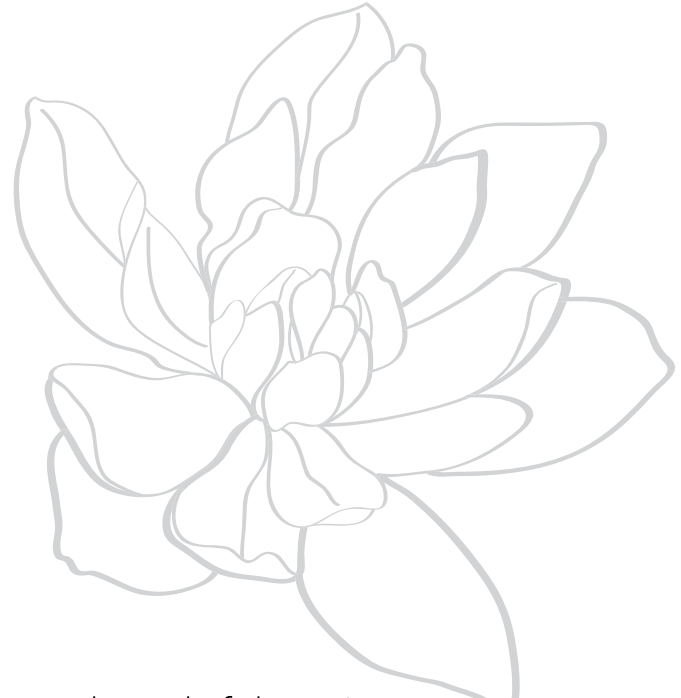

CARE

POWDER-COATED ALUMINUM & POLYURETHANE COMPOSITE requires little maintenance, however regular cleaning is recommended to keep furniture looking new. Wash gently with a mild non-abrasive cleanser, rinse well and let dry.

COMPOSITE SLING can be cleaned using a stiff brush and a mild, non-foaming, commercial cleanser. Rinse thoroughly to remove all soap residue and air dry.

WARRANTY

Oxford Garden warrants all outdoor furniture and accessories to be free from manufacturing defects in material and workmanship. Provided the furniture is assembled correctly and is subjected to normal use, Oxford Garden will cover your outdoor furniture under five, three and one year warranties, varying by material. For more details regarding the Oxford Garden warranty, visit oxfordgarden.com/warranty.
