

# WOVEN VINYL

Lloyd Flanders vinyl furniture is made with 100% virgin vinyl and has no added "fillers." This ensures that our vinyl will remain soft and pliable through many years of use and will hold its shape. UV inhibitors are added to protect from sun damage and prevent excessive fading.

Like our Lloyd Loom products, Lloyd Flanders vinyl furniture features welded all-aluminum frames that are corrosion-resistant and extremely durable.

Our vinyl collections are available in a variety of distinctive colors, textures, and styles that are suited for all of today's outdoor living spaces.

# TEAK

Lloyd Flanders offers teak tables that complement our Lloyd Loom and vinyl collections. Our premium teak wood is ideal for outdoor furniture because of its high oil content, inherent strength and tight grain. Teak is naturally resistant to decay and doesn't get brittle with age, adding to its capacity to withstand climate and environmental changes. Lloyd Flanders uses only sustainably-grown and -harvested teak wood in our outdoor furniture.
