

NexTeak: Fact Sheet

PROPERTIES: NexTeak is an advanced polystyrene wood made from recyclable polymer materials. It is all-weather, water resistant, UV-stable, mildew and mold free.

APPEARANCE: NexTeak has the appearance and touch of natural teak. Each piece is simulated with natural wood grain details, both on the surface and within cross sections. The process is carefully designed to produce a slight and unique variation in color for each piece, thereby further resembling natural wood.

CERTIFICATION: NexTeak is ASTM & ISO certified. It will withstand minus 16 degrees to 158 degrees Fahrenheit. UV inhibition withstands 2,000 hours QUV testing at ASTM G154 Standard. Panels can withstand 2,000 of pressure before breakage occurs.

MAINTENANCE: NexTeak requires no staining, painting or weatherproofing. It is highly resistant to alcohol, juice, and coffee spills under normal conditions and does not stain from normal household liquids. Cleaning is simple - a mild soapy solution is usually sufficient to remove dirt and debris. Oil stains can be removed using non-abrasive cleaners. Scratches and scuffs can be easily repaired using a scouring pad and sanding lightly with the grain.

RECYCLABILITY: Excess materials and furniture is shredded and sorted into reusable new material which is formed into rigid slats which are then used to produce the components of new furniture.

WARRANTY:

All NexTeak products are rigorously evaluated for outdoor environment. In typical residential and hospitality applications under normal usage, the frame has a 3- year limited warranty covering color change, deformation and/or breakage.

HISTORY:

The concept behind NexTeak was developed in 1998 in the U.K. and sold to a Chinese manufacturer for production. The product has strong worldwide recognition including North America, Europe and the Middle East. However the brand NexTeak and all of the designs were developed by and are exclusively Woodard.

PROCEDURE:

NexTeak frames are stored in our Texas warehouse, and you will receive inventory updates once our initial inventory is received. We now offer two finishes; Natural and Bark and cushions are ordered from the Woodard fabric selections identical to the way you order woven cushions. We already have other collections and expansion of items in the works for NexTeak and expect it to enhance our overall assortment of woven, aluminum, cast and iron.
