

POLY FURNITURE RECYCLED CONTENT COMMITMENT

Have you ever wondered how Berlin Gardens Poly Furniture is made? Many of our customers are unaware that our furniture is made from **96% RECYCLED CONTENT**, with the majority coming from post consumer milk bottles collected in community recycling programs. This is an overview of how a milk bottle is recycled and given new life as an Adirondack Chair which will last a lifetime.

The pellets move to a plastic extruder at Tangent where they are remelted and shaped into a variety of "on spec" recycled plastic lumber products.

POLY'TUF™

PolyTuf is the trademarked name for the Recycled Plastic Lumber manufactured by Tangent for Berlin Gardens.

Milk bottles are collected at community recycling centers, baled and shipped to **Tangent Technologies LLC*** where the transformation begins.

Sorting ensures that only the highest quality plastics continue through the recycling process.

Every milk bottle is ground, washed, melted and cooled to produce purified plastic pellets which are tested to maintain the highest quality control standards.

This Recycled Plastic Lumber is transformed at our Berlin, Ohio manufacturing plant into a range of beautiful Amish made Poly Furniture.

take life outdoors™
