

DIAGNOSTIC **OURA** **MAG**TM MIRA

Proudly Manufactured by:

C Products **Defense**®

DURAMAG SS™

KEY FEATURES

410 STAINLESS STEEL body is overbuilt for hard use

LIPLOCK™ technology keeps rounds secured and in proper alignment

ADVANCED GEOMETRY FOLLOWER™ remains level for consistent feeding

T-360™ total coating technology covers the entire magazine, inside and out

EVERFLEX™ anti-fatigue spring technology ensures long life and ultimate reliability

BERETTA® 92 SERIES/M9 SIG SAUER® P226

The DURAMAG SS™ standard 15rd capacity 9mm mags are now available for some of the world's most popular handguns. Feed your Beretta® 92 Series/ M9 or Sig Sauer® P226 from the world's finest magazines. DURAMAG™ has you covered if you are seeking flawless feeding and relentless reliability.

RUGER® LCP/LCP2 TAURUS® TCP

Lightweight and compact handguns like the 6rd TCP and LCP are the most likely to be constantly carried or left in storage as a backup. Riding close to the body, firearms are exposed to body humidity, pocket lint, and other imperfect conditions and yet these are the same firearms that may be depended upon in a life or death scenario. DURAMAG™ will perform perfectly even in imperfect conditions. (Carbon Steel treated with polished T-360™)

A MESSAGE FROM OUR PRESIDENT

The success of C Products Defense in manufacturing the most dependable magazines in the world comes from the dedicated team we have assembled to accomplish our goals. We forge strong relationships with our customers, suppliers, and others in the firearms industry because dependability is not just a part of our products; it's our way of life.

While developing DURAMAG™, thousands of almost-perfect magazines were detected and destroyed. Our engineers have worked tirelessly to ensure proper and consistent feeding for every shot. It's more than just the follower, spring, or magazine body that provides the solution, it's the constant harmony in which these three components must collaborate to feed your firearm regardless of external conditions.

In our first nine years, C Products Defense became industry leaders in innovation, creativity and quality. Those attributes are expressed through our DURAMAG™ line, which is proudly made in the U.S.A. and now available to every American. We understand that manufacturing jobs are the backbone of our country and we exert every effort to grow these jobs and remind the world what "Made in the USA" means. Join us in celebrating American strength with DURAMAG™.

Sincerely,

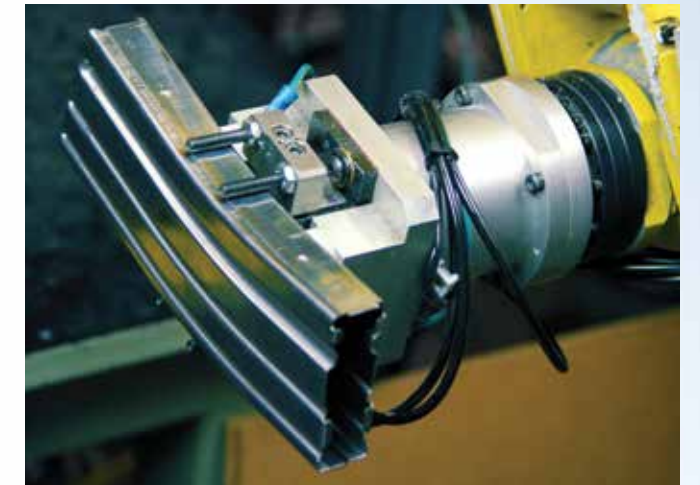

Adel Y. Jamil

President & Chief Executive Officer

ABOUT US

C Products Defense proudly manufactures all DURAMAG™ magazines in the United States of America. C Products Defense is leading the industry in innovation, creativity and quality.

Mission Statement: Our goal is to manufacture the best-designed, highest quality, 100% reliable magazines that work the first time, every time, because a firearm is only as good as its magazine.

A firearm is only as good as its magazine.

WHY SOME THINGS SHOULD NEVER BE PLASTIC

The weakest link in polymer magazines is one invisible to the naked eye. Polymer magazines have a strong affinity to attract moisture and will absorb it into their molecular structure when exposed to ambient air. This moisture within the polymer reacts constantly with surrounding environmental factors. The vapor pressure within the polymer increases to equal the vapor pressure of the surrounding environment until equilibrium occurs. This is referred to as polymer moisture equilibrium or PME.

When an environment of hot and dry air surrounds a wet hygroscopic polymer element, the vapor within polymer exits to the atmosphere, drying out the polymer. In other words, the polymer becomes dry and will deform from its original design and lose its flexibility. The opposite is also true, when the moisture within the polymer is cooled near or below the freezing point, the moisture within the polymer will freeze and the polymer will crack. There have been countless reports of polymer magazines shattering when dropped on a hard surface.

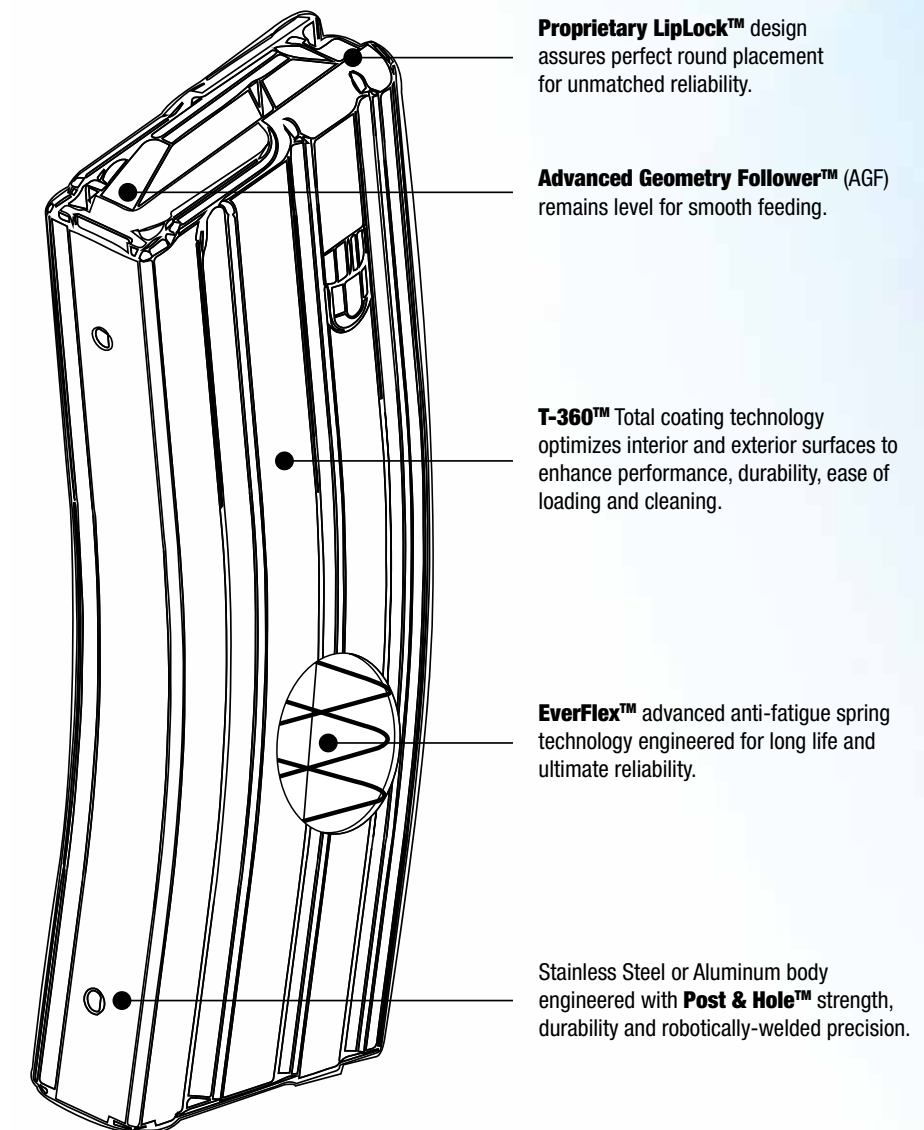

Aluminum and stainless steel do not have an affinity for moisture. Any moisture gained through condensation or immersion remains on the surface and is easily removed via evaporation or simply wiping it off. No moisture is absorbed into the metal.

Further protection is provided by the C Products Defense proprietary coating T-360™, which bonds at the molecular level and will never wear off. The T-360™ coating process also decreases friction and increases lubricity inside and out. The result is that even when using the dirtiest ammunition, DURAMAG™ magazines will effectively resist dirt or dust accumulation, allowing flawless operation and reliability.

WHY DURAMAG™

Plastic works fine for toys and casual use, but has proven molecularly unstable in extreme environments, vulnerable to changes in humidity, and unable to retain shape during extended use. DURAMAG™ is the one magazine design that you can rely on during a sunny day at the range, frozen night on the tundra, in the sands of the desert, or pulling from long-term storage. Relentless reliability because a firearm is only as good as its magazine.

DURAMAG SPEED™

KEY FEATURES

- 6061-T6 ALUMINUM** body is lightweight and durable
- LIPLOCK™** technology keeps rounds secured and in proper alignment
- ADVANCED GEOMETRY FOLLOWER™** remains level for consistent feeding
- T-360™** total coating technology covers the entire magazine, inside and out
- EVERFLEX™** anti-fatigue spring technology ensures long life and ultimate reliability
- POST & HOLE™** adds strength, durability and robotically-welded precision

5.56 / .223 / .300BLK ALUMINUM

DURAMAG SPEED™ magazine bodies are constructed of 6061-T6 aluminum and are type-III anodized to the mil-spec. This battle-proven magazine is lightweight, durable and feeds every time. DURAMAG SPEED™ mags have been the magazine of choice for OEM, Law Enforcement and Military Units throughout the world and are safe for extended storage while loaded. DURAMAG™ will not flex or swell like polymer. Available in 5rd, 10rd, 15rd, 20rd, and 30rd capacities and a wide range of colors for quick specialty load identification or to match your next build.

DURAMAG SS™

KEY FEATURES

- 410 STAINLESS STEEL** body is overbuilt for hard use
- LIPLOCK™** technology keeps rounds secured and in proper alignment
- ADVANCED GEOMETRY FOLLOWER™** remains level for consistent feeding
- T-360™** total coating technology covers the entire magazine, inside and out
- EVERFLEX™** anti-fatigue spring technology ensures long life and ultimate reliability
- POST & HOLE™** adds strength, durability and robotically welded precision

5.56 / .223 / .300BLK STAINLESS STEEL

The 5.56/.223/.300BLK DURAMAG SS™ is designed for serious shooters who require the most out of their magazines. Advanced interior and exterior geometries ensure ultimate reliability and feeding. Constructed from premium 410 Stainless Steel for maximum durability. When performance and durability are paramount, make the switch to DURAMAG SS™ and never look back. Available in 5rd, 10rd, 15rd, and 30rd capacities and safe for extended storage while loaded. DURAMAG™ will not flex or swell like polymer.

6.8 SPC / .224 VALKYRIE / 22 NOSLER

Specialty calibers require a special magazine. Look no further than the line of DURAMAG™ 6.8 Stainless Steel magazines. Guaranteed to feed your trigger finger without failure. Available in 5rd, 10rd, 20rd, and 28rd capacities.

DURAMAG

SS™

KEY FEATURES

410 STAINLESS STEEL body is overbuilt for hard use

LIPLOCK™ technology keeps rounds secured and in proper alignment

ADVANCED GEOMETRY FOLLOWER™ remains level for consistent feeding

T-360™ total coating technology covers the entire magazine, inside and out

EVERFLEX™ anti-fatigue spring technology ensures long life and ultimate reliability

POST & HOLE™ adds strength, durability and robotically-welded precision

.450 BUSHMASTER / .458 SOCOM

Love the stopping power of the AR big bores but your magazine can't handle the sheer power? Plastic magazines bulge and home-made modified metal magazines offer no guarantee. Do yourself a favor and get an American-made DURAMAG™ built for one job: to feed 10 rounds properly every time.

6.5 GRENDEL

While these rounds may have been designed to fit into common STANAG magazines, DURAMAG™ has taken things a bit further to design the ultimate magazine built specifically for your caliber of choice. Available in 5rd, 10rd, and 26rd capacities.

7.62x51 / .308 / 6.5 CREEDMOOR

Hard-hitting calibers demand serious magazines. DURAMAG SS™ SR25 pattern mags are made of laser-welded 410 Stainless Steel and protected with T-360™ - applied coating. This is a magazine that can withstand the test of time. The DURAMAG SS™ AR10-compatible magazine is the choice for Military units across the world. Available in 5rd, 10rd, and 20rd capacities.

7.62x39

Feeding tapered cases like the 7.62x39mm into the straight magazine well of the AR platform has never been easy. Until DURAMAG™, many thought the combination was simply not possible to produce reliably. With DURAMAG SS™, now you can finally enjoy the close-in power of 7.62x39mm reliably in your AR platform. Available in 5rd, 10rd, 20rd, 28rd, and 30rd capacities.

9MM COLT PATTERN

Loading the last round is just as easy as loading the first round with a DURAMAG™ 9mm – the longest lasting 9mm magazine on the market. Other magazines fail when filling to capacity: DURAMAG™ will outlast all others, first round to last. Available in 10rd, 20rd, and 32rd capacities.
