

Installation Instructions

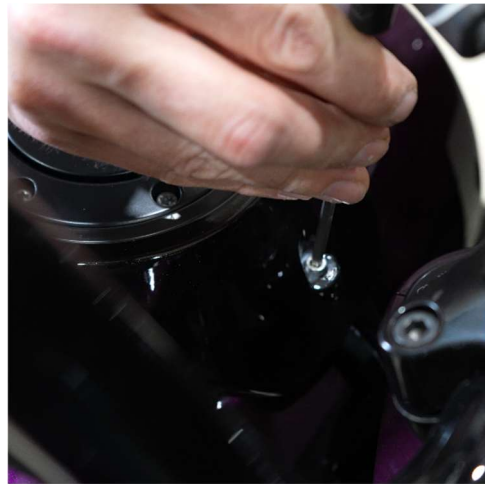

VVT-Style Touring Ascent Pro Gas Caps KUS61200, KUS61201 and KUS61202

A FACTORY SERVICE MANUAL WILL BE HELPFUL IN PERFORMING THIS INSTALLATION. DO NOT ATTEMPT TO PERFORM THIS INSTALLATION IF YOU ARE NOT CONFIDENT IN YOUR ABILITY TO COMPLETE ALL OF THE STEPS IN THE PROCEDURE; CONSULT A TRAINED TECHNICIAN. IMPROPER INSTALLATION COULD RESULT IN SERIOUS INJURY OR DEATH.

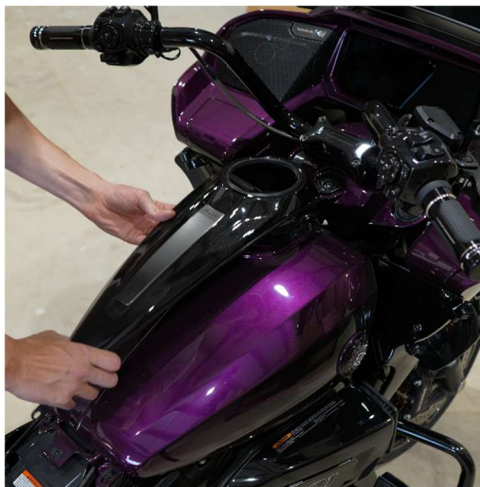

1. Securely support the motorcycle in an upright position.
2. Remove the seat and dash cover (tank console). Picture #1, #2 & #3
3. If your motorcycle is equipped with it, remove the hose clamps from both vent hoses and disconnect the hoses from the OEM fuel cap. Picture #4

#3

#4

4. Remove the OEM fuel cap assembly. Picture #5
5. Install the Kodlin Gas Cap, making sure the supplied gasket is correctly positioned and seated. Tighten the 6 bolts in a star pattern to ensure a proper seal on your factory filler neck gasket. Don't overtight bolts. Picture #6

6. Reconnect both vent hoses to the Kodlin fuel cap. **Do not reinstall the original hose clamps!** Picture #7
7. Reinstall the dash cover and seat according to the factory service manual. Picture #8
8. Verify proper operation of the fuel cap and check that the vent hoses are routed correctly without kinks or interference.
9. Start the motorcycle and inspect for proper fitment. Perform a short test ride and recheck the installation.

NOTE:

- Ensure the gasket remains properly seated during installation.
- Tighten the bolts in a “star pattern” to ensure proper seal on your factory filler neck gasket.
- Verify that both vent hoses are fully installed and routed without pinching.

NOTE: No warranty coverage is provided by Kodlin that is due to improper installation or lack of maintenance. Periodic maintenance and inspection are required. It is the installer’s responsibility to ensure that all the fasteners are tightened before operation of the motorcycle. We recommend following the Mfg.’s torque specifications provided by factory service manual.
