

B or D?

When you can't remember which way the "b" or "d" faces, touch your pointer finger to your thumb on each hand to make "b" and "d" shapes. Then put your hands in the empty spaces and say the alphabet figure out which one looks like "b" and which one looks like "d".

(Bonus Tip: Your left hand will make the "b" and your right hand will make the "d".)
