

High Quality Brass

- Heavy and durable
- Alloy of zinc and copper
- Superior finish

Care & Cleaning of Brass

Everyday care of a brass urn or memorial product is easy. A simple dusting from time to time will keep it looking nice.

If tarnish develops, you can remove it with brass polish and two cotton cloths. Apply a small dab of brass polish to the urn with the first cotton cloth. Then take a second cloth with no polish and gently buff the urn. Avoid areas with engraved artwork or text as repeated rubbing with brass polish can scuff or wear down engraving.

Small brown or gray spots on the urn's surface are common due to the mixed metals in brass. These spots are not tarnish and thus cannot be removed with brass polish.
