

## Howard Miller® Inserts

### TIPS FOR USE

#### SNAPLOCK BASE

★ **IMPORTANT** ★ Urn inserts cannot be re-opened once the snaplock base has been locked in place.

Only affix the base once the ashes are inside and you are ready to permanently seal.

#### PROTECTIVE FILM

Urn inserts are made of sheet bronze and come with a protective film (either clear or white in color) on the exterior to prevent surface scratches and damage.

- 1** It is recommended that the protective film be kept in place until the insert has been filled and sealed. When ready, gently pull up the corner of the film and peel off.
- 2** Once the protective film is removed, handle the insert with care until settled in its resting place.
