

Niche Cremation Urns

FOR URNS: MAE-100 & MAE-200

TIPS FOR USE

SNAPLOCK BASE

★ **IMPORTANT** ★ Niche urns cannot be re-opened once the snaplock base has been locked in place.

Only affix the base once the ashes are inside and you are ready to permanently seal.

PROTECTIVE FILM

Niche urns are made of sheet bronze and come with a protective film (either clear or white in color) on the exterior to prevent surface scratches and damage.

- 1 It is recommended that the protective film be kept in place until the urn has been filled and sealed. When ready, gently pull up the corner of the film and peel off.
- 2 Once the protective film is removed, handle the urn with care until settled in its resting place.
