RAVE REVIEWS

"What a great company to deal with. The items are well made, well packaged, and shipped quickly. The company is a breeze to work with."

Michael S.
Huntsville, AR

"To meet the custom and specific needs of commercial properties in a timely and professional manner is something that is priceless in our line of work. Ekena not only met our demands but exceeded them, and most importantly delivered in perfect time to install and meet our customer's demands. We are completely satisfied and our customers are completely satisfied. You cannot beat that combination of satisfaction!"

Alejandro S.
Houston, TX

"Ekena Millwork's delivery is 'amazon-quick' and priced reasonably. The product quality is excellent and the service is really extraordinary. I wish I was always so lucky on "out of amazon" experiences."

James H.
Boston, MA

"Ekena provided an easy solution for a $3.5 million construction project where the architect didn't know what to use. This was easy and efficient and reasonably priced."

-Frederick R.
Baltimore, MD

URETHANE CROWN MOULDING

Crown moulding is one of the fastest and easiest ways to add value to any interior project. Most commonly used to highlight the transition of wall to ceiling, crown is also used to cap off pilasters, accent cabinets or even build fireplace mantels. If needing large, decorative, or light-weight crown moulding, polyurethane is the perfect option for you.

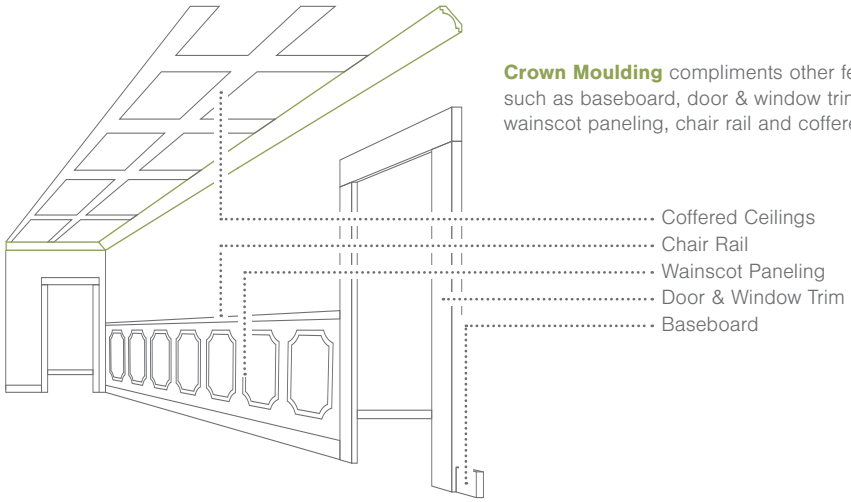

Our line of polyurethane crown gives the crisp, clean details of hand-carved wood moulding, but at a fraction of the cost and half the installation time. With over 400 profiles to choose from, we are sure to have the perfect crown for your project.

URETHANE PANEL MOULDING

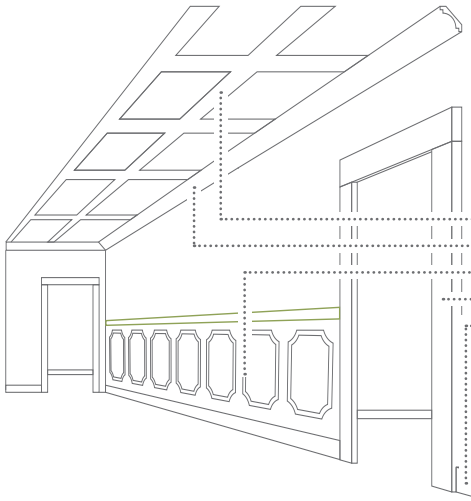

Overhaul a room and solve boring wall problems, with beautiful panel moulding profiles. Make a big impact for less with high-density urethane that is water-proof, rot and termite resistant, making it extremely durable with minimal upkeep. Great for use over paneling edges or framing out recessed designs on the wall, because it cuts like real wood without splintering or cracking and it does not require any special tools. It's an easy way to add a decorative, historic feel to walls, ceilings, and furniture pieces. The clean, crisp details mimic that of traditional plaster and wood designs, adding charm and interest to any space.

URETHANE PANEL MOULDING SYSTEMS

Our beautiful panel moulding and corners add a decorative, historic feel to walls, ceilings, and furniture pieces. Made from high-density urethane, each piece has crisp details that mimic traditional plaster and wood, providing a professional look at a fraction of the price. Completely transform a room in hours by using panel moulding systems to create an accent wall, add intricate wainscot paneling, or creating wall paneling that matches your crown and base moulding. Our moulding systems are a breeze to install and make you look like a pro.

URETHANE BASEBOARD

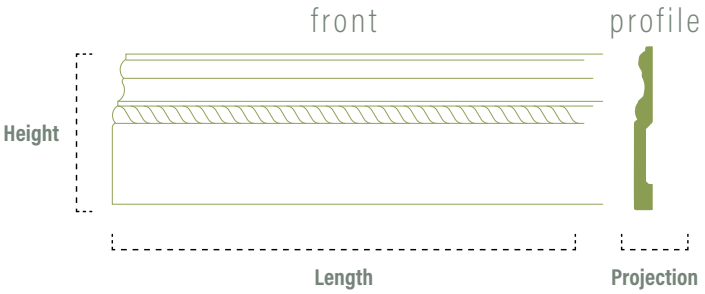

Traditional detailing with baseboard provides a timeless and elegant look in any room. Baseboard moulding is a practical way to hide unsightly gaps between the floor and wall and adds a beautiful finishing touch. Available in classic and contemporary patterns in a wide range of pre-primed profiles.

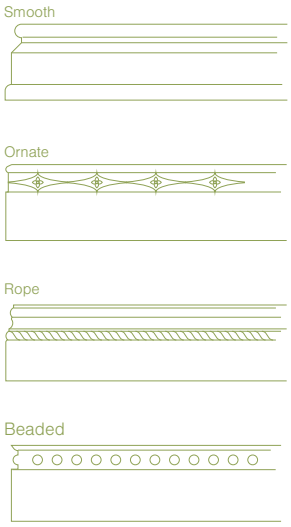

Proving to be a durable alternative to traditional materials, urethane baseboards will not rot, warp or crack, and are impervious to insect infestations. Urethane baseboards are a worthwhile investment with minimal upkeep that complements other moulding types for a balanced look.

Baseboard compliments other features, such as crown moulding, door & window trim, wainscot paneling, chair rail and coffered ceilings.

- Coffered Ceilings
- Crown Moulding
- Chair Rail
- Wainscot Paneling
- Door & Window Trim

URETHANE WAINSCOT PANELING

Save time and money with preassembled panels for a traditional wainscot look, without the hassle of measuring, cutting and assembling individual moulding pieces. Made of solid polyurethane for maximum durability and detail for a lasting upgrade to any home.

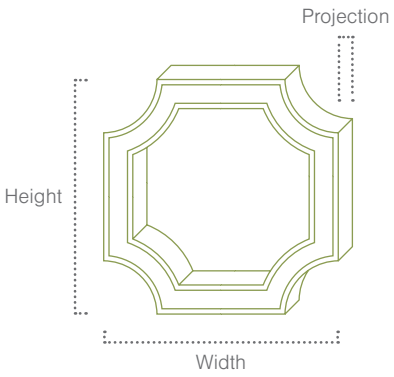

The panels are lightweight for quick and easy installation and factory primed ready for paint or faux finish. Easily attaches to furniture, doors and walls for an elegant finished look. Achieve an opulent custom space by pairing the panels with coordinating crown moulding, baseboard, and door and window casing for a more balanced style.

Designer Styles available in several classic designs and multiple sizes for convenient ordering, saving time and money.

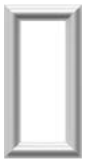

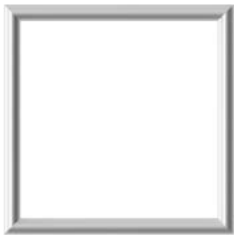

Wainscot Paneling is complimented by other features, such as crown moulding, baseboard, door & window trim, chair rail and coffered ceilings.

ENDURATHANE FAUX STONE PANELS

Increase the value of your residential or commercial property with our stunning faux stone panels. Renovating your project just got faster and easier than before, with our lightweight and durable urethane panels that install in minutes.

Endurathane panels are an attractive, cleaner alternative to messy, hard-to-install real stacked stone. Our panels make the perfect accent wall or beautifully adorn a bland partition in commercial spaces.

FAUX**STONE**PANELS

FAUX STONE PANELS
For a quick easy installation, the tongue and groove panels interlock for a seamless design and simply install with construction adhesive and screws.

EFFORTLESS INSTALLATION

With striking patterns and natural earth-toned finishes, our lightweight, easy to install faux stone panels bring the look of real rock to any interior or exterior. Offered in a large variety of styles and color options in both premium and economy panels, there's a choice to suit every need. Faux stone creates a warm, inviting look that works anywhere. Try it in your kitchen, living room, porch or sun-room for a special look.

URETHANE COFFERED CEILINGS

Transform your ceiling into an elegant and timeless display that makes a bold statement while adding significant value to your living space. Coffered ceilings are a classic architectural design that brings out depth and dimension to an otherwise plain ceiling. Our urethane coffered ceilings are carefully modeled after original historical patterns and design, ensuring an authentic look. Compared to wood, they are much lighter weight, making for an easier install. What was once considered an expensive luxury, is now an affordable endeavor that exemplifies opulence.

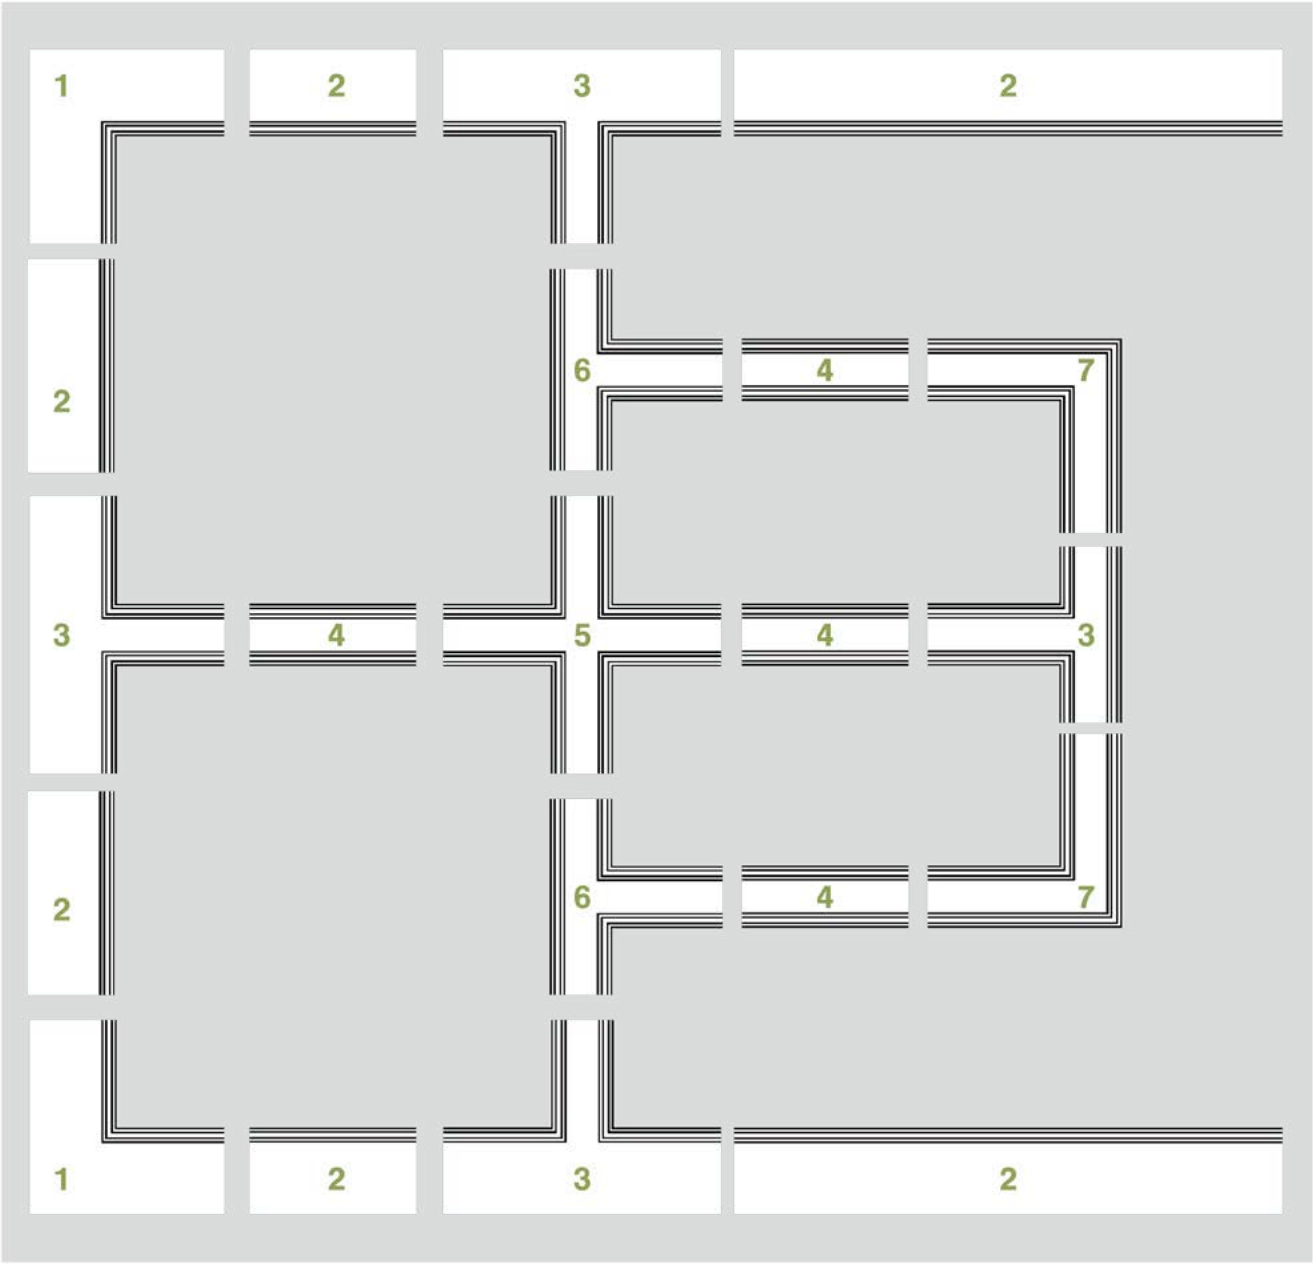

WHY CHOOSE ENDURATHANE COFFERED CEILING SYSTEM:

- Old-world custom ceiling design with the efficiency of modern material and fabrication.
- Install quicker, easier, and with greater precision.
- Do it yourself, no professional needed. Save time and money.
- Light-weight, perfect for any ceiling height.
- 8 different designs – intersections available in cross, circle, diamond and square.
- Low Maintenance. Impervious to moisture and insects.
- Available to ship within 72 hours. Need it faster? Tell us, and we will ship tomorrow!
- More cost-effective than traditional site-built wood systems.
- Ekena Design Experts to assist in entire layout process.
- Simple to design. Easy to order.
- Lifetime warranty.

COFFERED CEILING SYSTEM BREAKDOWN

The Ekena Millwork Coffered Ceiling System is made up of various parts.
Below is a dissection of what our coffered ceiling system looks like broken down.

1. **Perimeter Corner -** Has flush back to butt up against the wall for a seamless joint.
2. **Perimeter Beam -** Has flush back & comes 96" long.
3. **Perimeter Tee -** Has flush back & extends away from the wall to connect with the inner beam or intersect pieces.
4. **Inner Beam -** Spans up to 96" & has trim detail on both sides.
5. **Intersect Piece -** Comes in four styles & eliminates the need to miter cut.
6. **Inner Tee -** Creates the opportunity to design inner patterns. Has trim details on the edges.
7. **Inner Corner -** Creates the opportunity to design inner patterns. Has trim details on the edges.

STEP BY STEP INSTRUCTIONS

When measuring your ceiling, ensure that you take into account the variations in your ceiling. We recommend measuring various points even if the measurement appears to be the same. Diagram 1 shows you dotted lines to give you a rough idea of what you should be measuring.

After measuring your ceiling, determine how many coffers you would like on your ceiling. Using that as your guide, it is recommended that you draft up a sketch like Diagram 2. Starting with your corner pieces and then working around the perimeter, determine how many tee pieces and intersects you will need. The result will be a parts list and how many pieces of inner and perimeter beams will be needed for your project.

COMPONENT LIST:

- **A** 4 Corner Pieces - CC05PIC02X14X14TR
- **B** 10 Perimeter Tees - CC05PTE02X14X20TR
- **C** 6 Intersect Pieces - CC05ICI02X20X20TR
- **D** 3 Perimeter Beams (96” Each) - CC05PBM02X06X96TR
- **E** 3 Inner Beams (96” Each) - CC05IBM02X04X96TR

URETHANE CEILING RINGS

Accents such as ceiling rings and medallions offer a great opportunity to upgrade a plain light fixture or ordinary ceiling space to an extraordinary focal point. These quick install and affordable additions come in durable, dense polyurethane and a vast range of sizes, shapes, and styles.

Ceiling rings and medallions are jewelry for the home, and when paired together, they compose a grand effect. Throw in a sparkling chandelier, modern pendant, or ceiling fan, and the combination creates the perfect signature style. Dream up and inspire an original piece of artwork with our rings by creating your own concept and makeover your ceiling space into something wonderful.

URETHANE CEILING DOMES&TILES

Urethane ceiling domes enhance interiors with rich texture and traditional appeal. Many of our urethane ceiling domes include classic decorative details, ranging from floral motifs to crisp features. Whether you seek something subtle or ornate, there's a design for every style. Each ceiling dome is factory primed and ready for paint or faux finish. Each dome is manufactured out of a high-density urethane foam, which is great for durability, but is also lighter than other materials to make installation a snap. Enhance your space with a beautiful ceiling dome focal piece.

Our ceiling tile collections are modeled after original historical patterns and designs. Each piece is molded with rich texture and deep relief, sharp lines for a truly unique look. The dense urethane tiles are beautifully detailed and light weight, offering a new easy install alternative to other ceiling accents. Ceiling tiles are great for covering damaged or popcorn ceilings, allowing a new surface without losing ceiling height. Grid drop ceilings are easy to care for and are perfect for hiding duct work and wiring or allowing ready access to pipes. There is a ceiling tile style to meet every taste. Basic, modern, classic and elaborate styles offer a range of looks.

ENDURATHANE FAUX WOOD MANTELS

Our faux wood mantels capture the rustic nature of authentic beams at a fraction of the cost and installation time. These hand-painted, lightweight composite mantels are simple to install. You can also use them as a functional piece of art or a beautiful floating shelf. Made to last, our faux wood mantels beautifully replicate the weathered texture and finish of real wood beams. Additionally, add rustic flare, warmth and charm to any space by using them as floating shelves. Available in several designer finishes and textures and in multiple widths, depths and heights to fit every project need.

FAUX WOOD MANTELS

Exposed beam mantels offer cost-effective elegance and are a great way to give your space distinctive, rustic charm. At a fraction of the cost of real wood, faux mantels give you an authentic, alluring look.

GET THE NATURAL LOOK FOR LESS

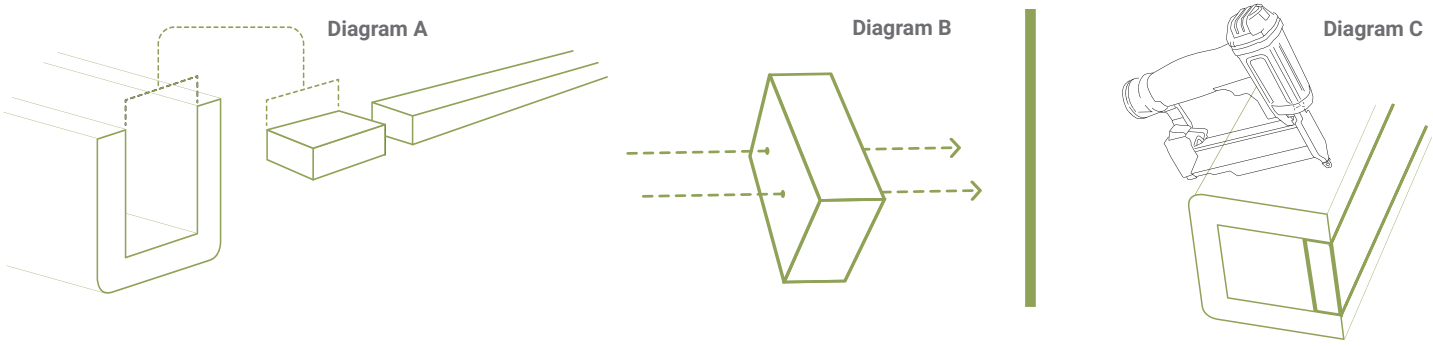

Manufactured from high-density polyurethane, our faux wood mantels are made to look just like the real thing. Truly, you can't tell the difference once installed. Available in a myriad of finishes, styles and textures, these lightweight, easy to install alternatives to authentic wood mantels make it simple to upgrade your space.

With so many options and unique hand-painted finishes, you can customize your mantels to match your interior style perfectly. Our modern whitewash and honey dew finishes are finding their way into classic ranch, contemporary and farmhouse style homes all over the country. The applications are endless with the versatility our maintenance-free faux wood mantels offer.

ORDER A SAMPLE

Find the perfect look and style for your project before you buy, with samples that offer a preview of our stunning panel designs.

SIMPLE AS 1-2-3

1. If needed, measure inside width of the beam and cut wood blocking to fit inside width dimensions. (Diagram A)
2. Simply attach wood blocking into studs in desired installation location. Apply adhesive to the 2 x 4 blocking. (Diagram B)
3. Slide mantel over the 2 x 4 and screw or nail through the top of the mantel to anchor it into the 2 x 4. (Diagram C)

URETHANE NICHES

Achieve a dramatic focal point and visual interest with a decorative architectural feature that provides an attractive spot for displaying your favorite things in a unique way. Surface-mount wall niches are lightweight with flat smooth backs, and are designed to easily attach to the surface of a finished wall, much like a piece of artwork. Recessed-mount wall niches on the other hand, are designed to fit between two studs into a precut hole of a finished wall for the niche to fit securely into for a more concave, deeper look.

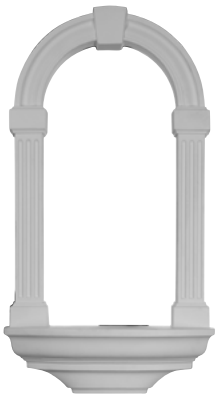

Designed in a variety of styles to suit every decor, choose an arching dome for traditional styles or clean straight lines and distinct corners to convey a more modern look. For a unique storage solution or display that doesn't take up a lot of space, choose one of many styles with a shelf for a one-of-a-kind piece.

URETHANE CROSSHEADS

These designer casings highlight attractive windows, doorways or large entryways. Made of lightweight, yet durable high-density urethane, our crossheads are easy for anyone to install. Perfect for exterior and interior use with custom sizes and design choices, you're sure to find the perfect fit for your project. For an effortless signature look, our urethane crossheads come as one seamless piece embellished with elaborate dentil or egg and dart trim or keystones, saving time and money.

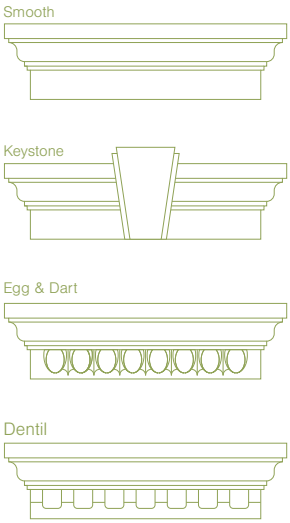

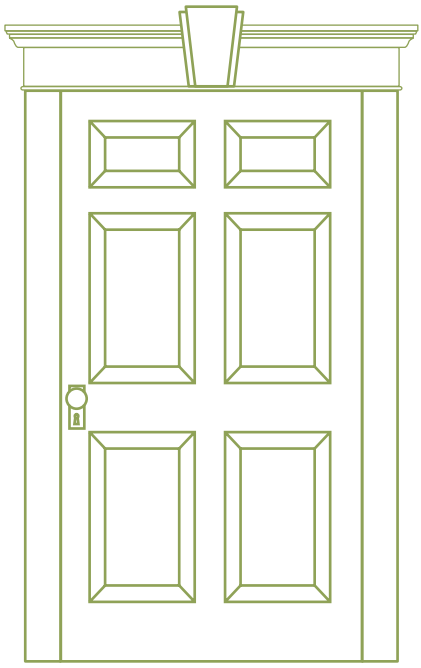

The wider the entryway opening and/or the taller the ceiling, the larger the crosshead needs to be for a balanced look.

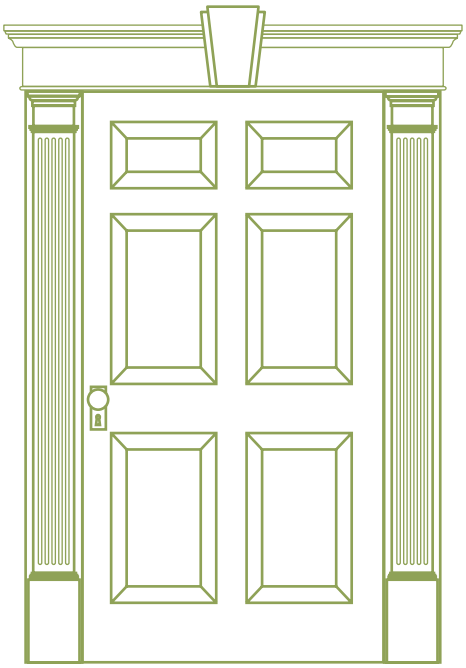

Crossheads can be used for a variety of interior and exterior applications, including a fresh new take on a fireplace mantel.

URETHANE PILASTERS

Pilasters provide a raised-column look while melding historical and traditional design and a functional trim solution. Enhance the exterior or interior of your home with urethane pilasters paired with capitals and bases, giving the appearance of sturdy, stately columns. Combined with a crosshead and pediment, you can create a balanced entry system that gives interest and texture in place of an ordinary doorway. Similar to real columns, pilasters can have a plain or fluted surface and represent a variety of architectural styles.

URETHANE CAPS, BASES & PLINTHS

Imperative to achieving a beautiful finished product, urethane capitals offer an undeniable column-like look. Modeled after original classic patterns and designs, these solid urethane capitals are made for maximum durability. Urethane plinths and bases complete the polished, historically accurate column appearance. Authentic detail in the plinths and bases accentuate and enhance your project, while staying true to the details of fine craftsmanship. Polyurethane offers a material that is not only long-lasting, but is easily painted, installed, and enjoyed for years to come.

FIBERTHANE BALUSTRADE

For stunning staircases, terraces and balconies, balustrade is one of the finest architectural elements for creating a dynamic and unique space. Our FiberThane® balustrade is a hybrid system that utilizes the strength and durability of fiberglass with the crisp detail of polyurethane. Our balustrade systems are built from superior low maintenance materials, and meticulously finished to a smooth beautiful appearance ensuring rich detail and quality craftsmanship.

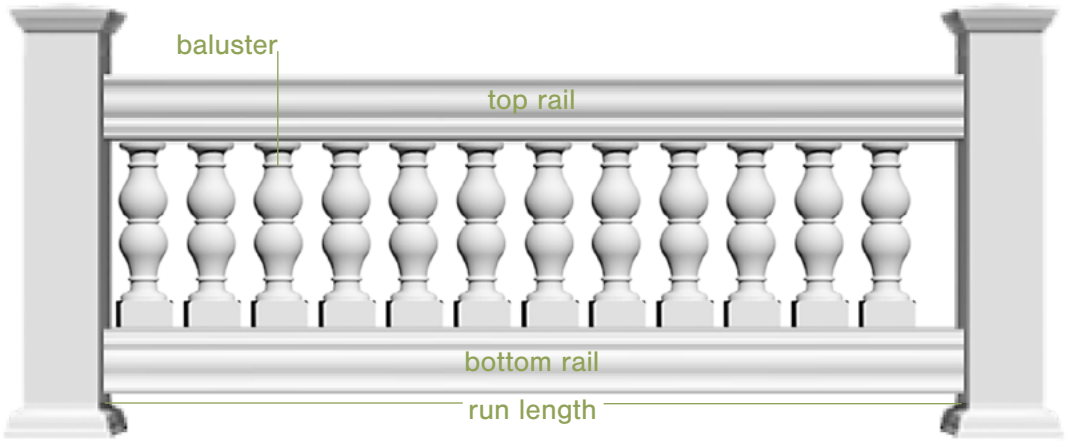

Our exclusive FiberThane® is the only light-weight system that can span 16' lengths without needing a newel post or column, providing a seamless, elegant design. Not only is it the strongest system available, but with our quick-install brackets, it is also the quickest and easiest to install. Additionally, we made sure it is the most cost-effective system you will find and we offer personal consultations and project estimation by our experienced column and balustrade specialists.

System Components

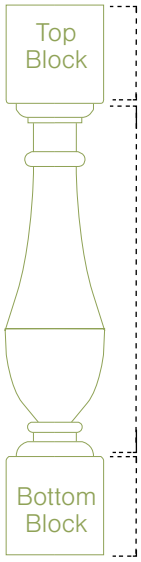

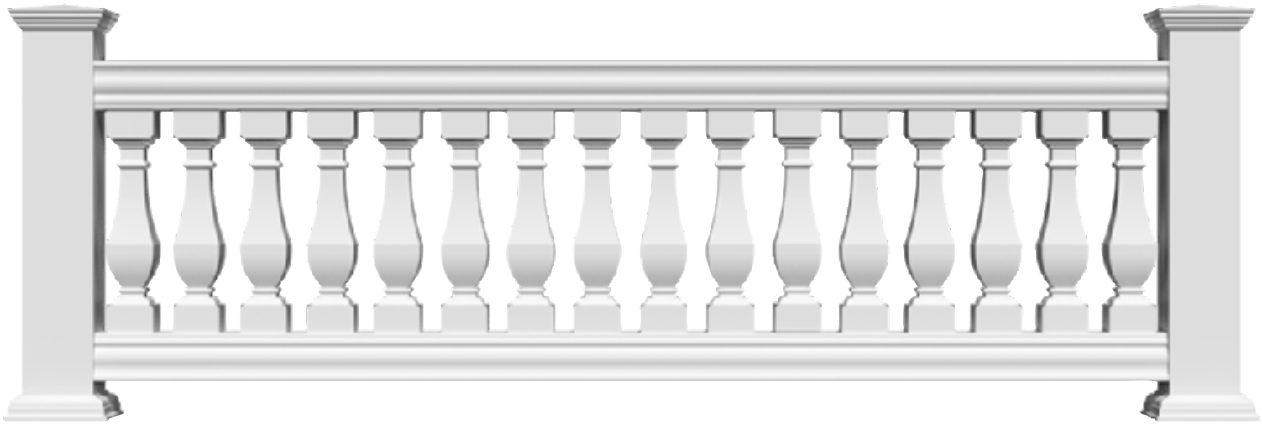

WHY CHOOSE THE FIBERTHANE® BALUSTRADE SYSTEM:

- Fiberglass top and bottom rails are more durable than any other material in the market.
- Is light-weight (between 15lbs - 22lbs per foot), making it perfect for every application.
- Can span 16' lengths while still passing construction codes.
- Rails are sold in one-foot increments. This means no wasted rail.
- Patent Pending 'Quick-Install' brackets are concealed and provide a completely finished look.
- The 'Quick-Install' brackets allow for quicker installation than traditional methods.
- Over 100 different baluster designs – balusters available with either round or square blocks.
- Easiest stair installation you have ever seen. Ask us, we will explain.
- Low Maintenance. Impervious to weather, moisture, and insects.
- Will not crack, chip, or deteriorate.
- All spindles, rails, and newels are 100% unique designs.
- Pre-drilled holes or even full length pre-assembled sections are available.
- Available to ship within 72 hours. Need it faster? Tell us, and we will ship tomorrow!
- More cost-effective than Urethane or FRP systems.
- Lifetime warranty.

BALUSTRADE INSTALLATION INSTRUCTIONS

1. Installing Newel Posts (Figure 1)

A. Use the installation kit or appropriate installation hardware.
B. Slide the trim collar down to cover up the hardware and glue the collar in place.
C. Glue the post cap in place with PL Premium.

2. Determine Rail Lengths

A. Measure the distance for each section of the balustrade you need.
B. Cut your top and bottom rails to the lengths that you measured for each section. Cut rails 1/4" shorter than needed if using the Quick-Install installation brackets. The rail installation brackets will make up for this 1/4".

3. Calculate Number of Spindles Needed for Each Section (Figure 2)

A. Divide each section length by the spindle's 'Recommended On-Center Spacing.' This is the maximum spacing to pass the nation-wide 4" sphere code.
B. Round up to the nearest full number. This is how many spindles you are going to use.

4. Spindle Spacing and Pre-Drilling (Figure 3)

A. Take the number of spindles that you calculated in step #3 and divide the section's length by that number. This will give you the exact on-center-spacing for that specific section (each section that is a different length will have slightly different on-center-spacing).
B. Find and mark the centerline on the top and bottom rails.
C.Take the on-center-spacing calculated in "A", and divide it by 2. This will give you the distance from the newel post or wall to drill your first hole. Drill your first hole at this point on the centerline.
D. Drill each additional hole along the centerline at a distance of the on-center-spacing calculated in "A" until all holes are drilled for the section.

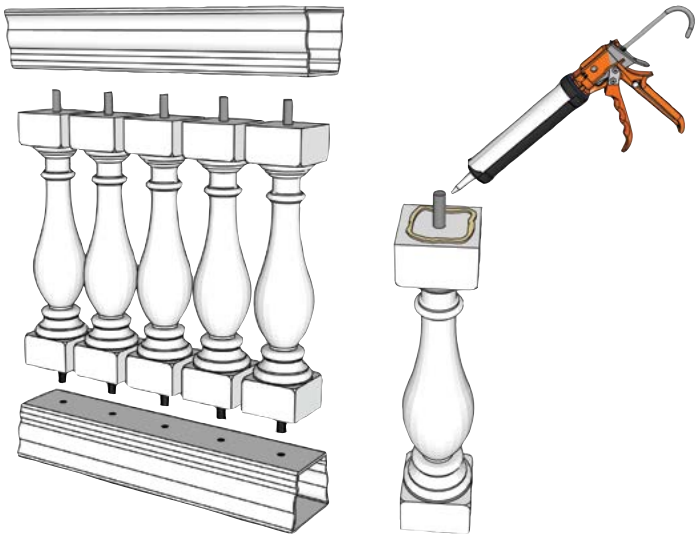

Figure 4

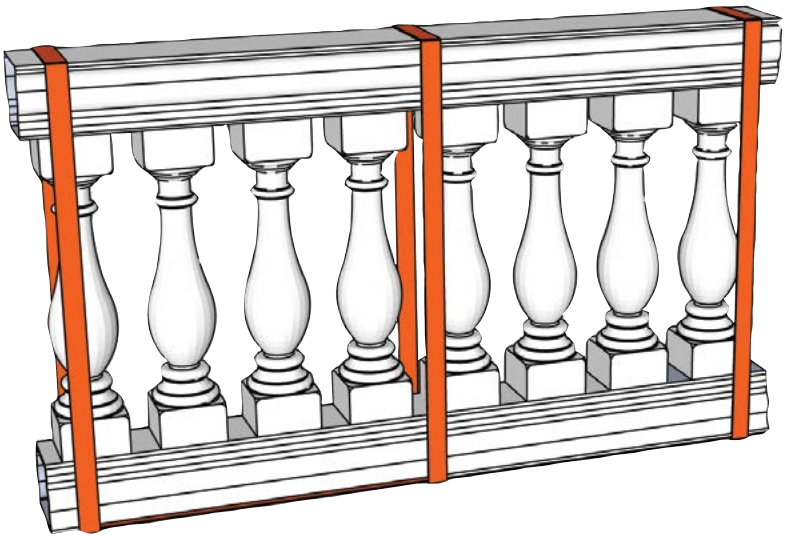

Figure 4

5. Assemble Each Section (Figure 4)

A. Apply a small bead of PL Premium adhesive to the bottom of each spindle. Insert the bottom of the spindle rods into the pre-drilled holes on the bottom rail. Do this for every spindle in the section.
B. Apply a small bead of PL Premium adhesive on the top of each spindle.
C. Place the top rail over the spindles, inserting the spindle rods into the pre-drilled holes on the top rail.
D. Use straps to hold the balustrade section together while the adhesive dries.
E. PL Premium normally dries within 24 hours.
F. Remove excess adhesive.
G. Remove straps once adhesive sets.

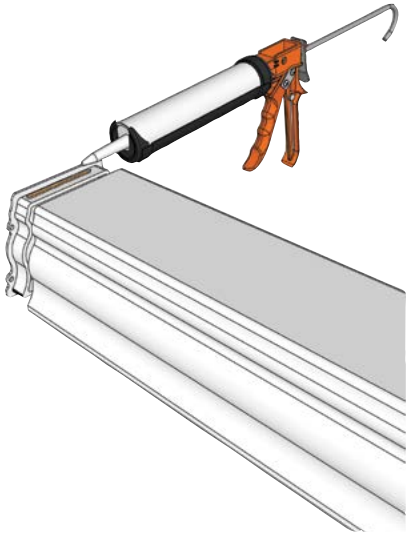

Figure 5

6. Attach the Assembled Sections to the Newel Posts or Wall (Figure 5)

A. Apply a bead of adhesive to the rail installation bracket insert.
B. Insert the rail installation brackets into each side of the top and bottom rail.
C. Screw the railing brackets into your newel posts/wall.

NOTE: The finished system must be painted with an exterior grade 100% acrylic latex paint.

For stair applications, taller top and bottom blocks are recommended. Provide rise and run of steps to determine angle of stairs.

Call for stair or round column application installation instructions.

URETHANE FAUX WOOD SHUTTERS

Urethane faux wood shutters stay true to authentic wood by not only having a wood grain, but also by having the ability to be either gel stained or painted. Longevity of our faux wood material is priceless; without sacrificing the appearance of real wood shutters. Compared to real wood, they are much lighter for a hassle-free installation. An added bonus, they are not susceptible to common issues of organic wood such as rotting, termites, or warping. With an incredible selection of sizes and popular styles to choose from, you are sure to find one that suits your home's style.

MADE TO ORDER: POSSIBLE EXTENDED LEAD-TIMES

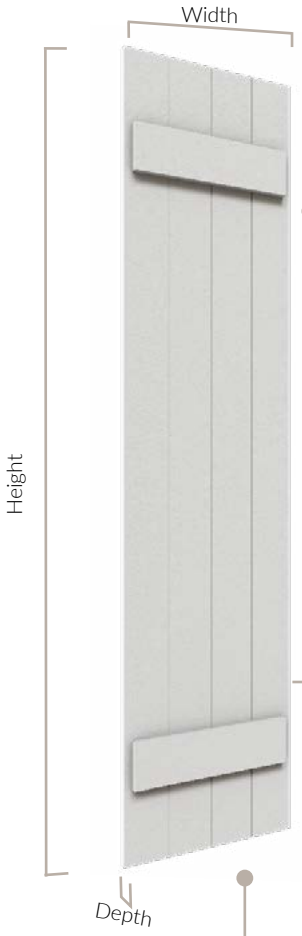

Our rough sawn woodgrain faux wood shutters are a quality, cost effective alternative to wood. Your home will surely stand out from the rest while carrying your personal style outdoors. Choose just the right design to enhance your windows and create lasting, dramatic curb appeal.

FUNCTIONAL

NON-FUNCTIONAL

The functional gable vent does not have a louver box. This option has minimal opening under louvers to allow for some airflow.

The decorative gable vent does not have a louver box. It is applied as a surface mount vent. This option is used when you don't have a need for ventilation, but you want to give your gable a nice finished look.

IRON BRACKETS

Hand-forged iron has been used in building and design concepts for centuries. With modern technological advances, wrought iron can provide a lasting, sturdy support or distinctive decorative element with eye-catching appeal. Instantly transform a room with inspired open shelving, or customize a pantry, closet, or cabinet with old world charm, rugged rustic flair, or minimal sleek style.

Complement your natural stone countertops, fireplace mantels, granite bars, shelving and entryways with skillfully designed iron brackets. Perfect for indoor applications without sacrificing design and functionality. Capture a rustic timeless feel with an unfinished raw look where natural patinas acquired over time create a deeper, richer color variation. Explore several metallic finishes to accent traditional and contemporary aesthetics. Achieve an urban-inspired or industrial theme with multiple sizes of brackets that can accommodate a myriad of countertop or shelf depths.

ZINC PLATED VS. STAINLESS STEEL?

There are two primary differences between zinc plated steel brackets and stainless steel brackets: corrosion resistance and finish. Stainless steel brackets are naturally resistant to rusting, whereas zinc plated steel needs to be fully finished. In addition, stainless steel brackets come with a high quality brushed finish for that popular upscale look. If you are looking for the raw steel look or to paint these brackets, then the zinc plated steel is for you.

- 1/4 inch thick steel provides ultimate support
- Pre-drilled holes make installation as easy as it gets!
- Great for supporting countertops and shelves
- Both stainless and brushed zinc plated steel options
- Welds are on the back for a clean and finished look
- In stock and ships within 24 hours

CARVED ONLAYS &ROSETTES

Carved wood onlays and rosettes are made from premium selected hardwoods. Each individual piece features clean cut-in, deep relief. Onlays are sanded to an ultra-smooth finish, and are ready to accept stain or paint. Hardwood onlays are perfect for wall applications, finishing touches on cabinets and furniture or creating a dramatic focal point on a fireplace mantel. Crafted with a standard of quality, elegance, and fine precision; our carved wood onlays and rosettes offer unmatched refinement for a variety of projects.

WOOD MOSAIC WALL TILE

Create an attractive focal point with decorative reclaimed wood tiles. These mosaic style tiles offer rustic wood detail that brings sophistication to your setting coupled with durable construction that ensures lasting beauty. These artisan wood tiles provide a unique, modern alternative to standard flat wall textures. Our boat wood tiles are the newest and easiest way to create interesting patterns, elaborate works of art, or memorable feature walls and ceilings.

Available in rectangle or square sizes allowing for versatile design options and creativity, and can be used vertical or horizontal to achieve different looks. Ideal for residential or commercial applications where you need a wow factor that sets you apart from the rest.

RUSTIC

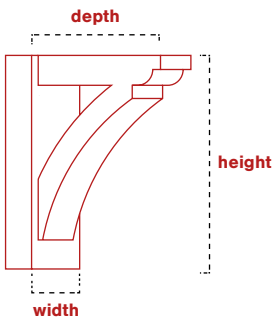

TIMBER

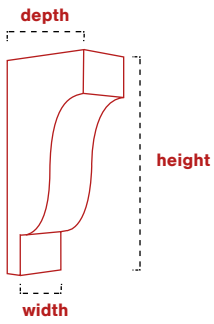

RUSTIC TIMBER

Our rustic timber collection is an instant classic. Our rustic wood millwork utilizes technologies of today to build the ‘log and timber’ wood products that have been in architecture for centuries. Because our products are not kiln dried, each item in our rustic timber collection is 100% unique and will contain the natural variations that the wood species offers.

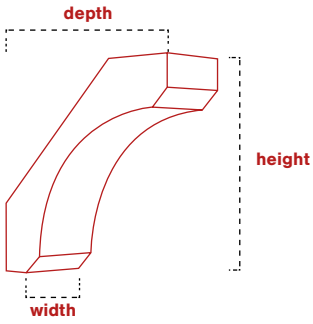

Every wood bracket, corbel, rafter tail, or gable vent will contain unique colors, grains, textures, knots, sapwood, and heart wood content; as well as possible sap bleeding, and even natural checking, splitting and cracks. These natural variations are what make the rustic collection stand out from the rest as truly natural wood products.

WOOD SPECIES

We offer our rustic collection in both douglas fir or durable cedar. All of our wood is carefully chosen and hand inspected before assembling your item. After each item is made, it is again inspected to ensure you receive only the highest quality product on the market.

ROUGH SAWN OR SMOOTH

The smooth finish cedar or fir is milled to perfection in our state-of-the-art wood shop. The rough-sawn finish offers a natural, more rustic look. The rough sawn products are timeless, offering the saw-textured surface obtained during the milling process that give you the look of freshly cut lumber.

Smooth products are nominal sizes: 6” smooth is 5.5” and 4” smooth is 3.5”.

Perfect for indoor and outdoor applications without sacrificing design and functionality. Our rustic corbels compliment countertops, mantels, porches, bay windows and entryways with skillfully designed style options.

RUSTIC TIMBER GABLE VENTS

Our rustic timber gable vents are an instant statement that add exceptional beauty and value. Gable vents greatly enhance the look of your home while providing purposeful function. Achieve the perfect look for every architectural style home with our durable wood vents that easily install on any exterior surface. Handcrafted and manufactured in the USA offering the authentic beauty of real wood that can be painted or stained to match your home's exterior color scheme. We offer a wide range of custom shapes and designs to accommodate any project need. Each gable vent is made-to-order for that signature style that will set your home apart from others.

BRICK MOULD OR FLAT TRIM

All of our vents are available with either a brick mould frame or a standard 1”x4” flat trim. Brick mould is perfect for new construction or when you need to run siding up against the vent. For all other application, the 1”x4” trim will work perfectly for you.

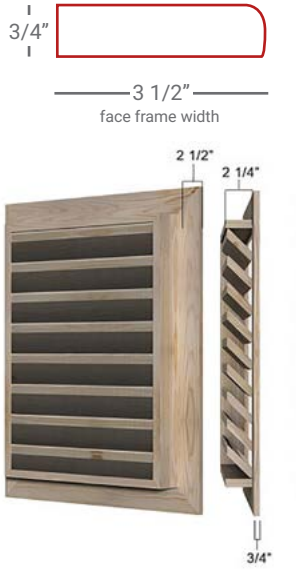

NON-FUNCTIONAL FRAME

non-functional

The decorative gable vent is a 1-1/2” thick frame, and does not have a louver box. This option is used when you don’t have a need for ventilation, but you want to give your gable a nice finished look.

FLAT TRIM FRAME

functional

The 1” x 4” flat trim is designed for flat, even surfaces and uses a traditional 4” flat trim. This is the ideal choice for flat surfaces and allows the frame to be easily screwed in place.

BRICK MOULD FRAME

functional

The brick mold trim is a great choice for installing a vent in an area with brick, vinyl and other sidings. The thicker trim allows the siding to run up underneath the profile to provide an even installation.

ROUGH SAWN OR SMOOTH

The smooth finish Cedar or Pine is milled to perfection in our state-of-the-art wood shop. The smooth finish vents are also the perfect option if you plan on painting them. The rough-sawn finish offers a natural rustic look. The rough sawn vents are timeless, offering the saw-textured surface obtained during the milling process that give you the look of freshly cut lumber.

ARCHITECTUR

AL GRADE PVC

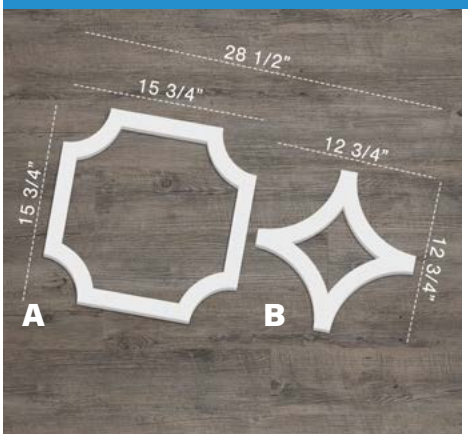

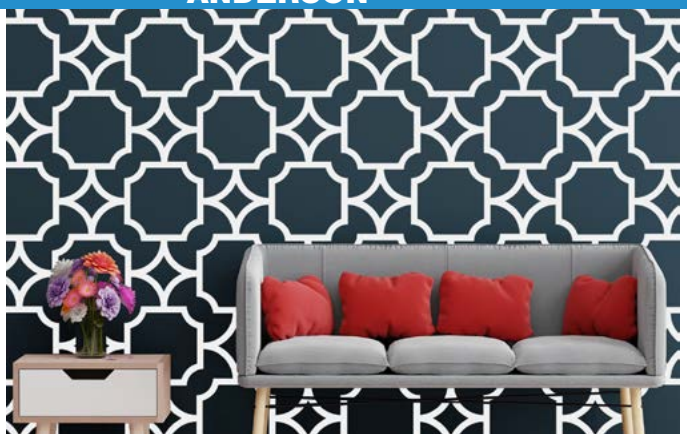

PVC FRETWORK PANELS

Create an alluring focal point with decorative fretwork panels. Intricate flourish details bring sophistication to your setting with durable construction and lasting beauty. These artisan panels provide a unique, modern alternative to standard wall textures. These PVC panels are the newest and easiest way to create whimsical patterns, elaborate silhouettes, or memorable feature walls and ceilings.

Our panels are available in two sizes allowing for limitless design options and creativity. PVC is waterproof, dent-resistant and lightweight making installation ideal for both interior and exterior, residential and commercial applications. Especially created for spaces where moisture is an issue, they can stand up to any condition and aren't prone to peeling, warping or bubbling; making them virtually maintenance free. They were built for homes and community spaces where people move, explore and live life.

PVC DECORATIVE WALL PANELS

Our high-end wall panels are a great way to make your space vibrant and lively by adding interest and texture.. Skip the hassle of measuring, cutting and assembling individual moulding pieces. A modern take on decorative, historic wall panel designs, available in four styles. Make a statement by adding them to furniture, doors and walls for a professional finished look. Achieve a custom look by pairing the panels with coordinating flat profile crown moulding, baseboard, and door and window casing.

DECORATIVEWALLPANELINSIGHTS

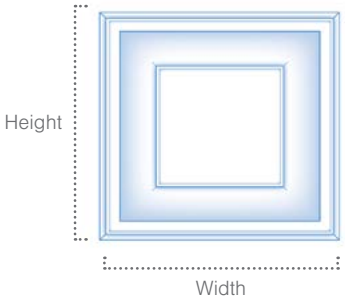

Designer Styles available in several classic designs and multiple sizes for truly custom layout design options.

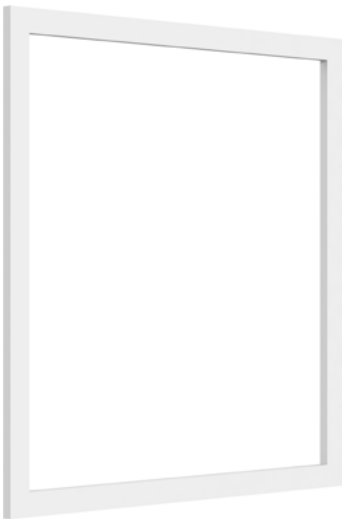

Wall Panels are complimented by other features, such as crown moulding, baseboard, door & window trim, chair rail and coffered ceilings.

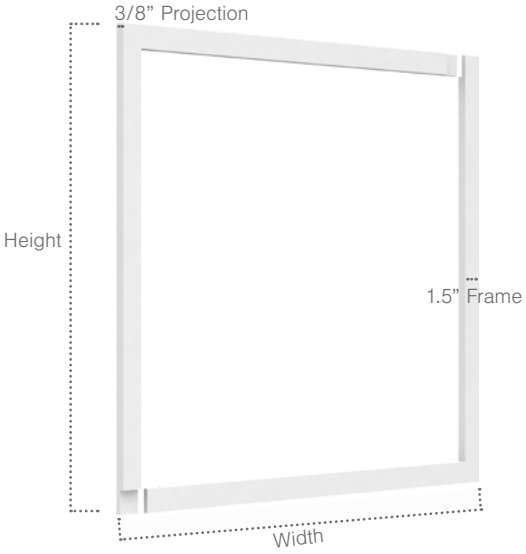

- Coffered Ceilings
- Crown Moulding
- Chair Rail
- Door & Window Trim
- Baseboard

PVC ENDURAWALL 3D PANELS

Why have ordinary walls like everyone else, when you can create a masterful work of art with decorative 3D wall panels. For centuries, homeowners and designers alike have desired fresh alternatives to standard wall textures. 3D wall panels are the newest and easiest way to create playful bold patterns, simple silhouettes, or memorable feature walls and ceilings.

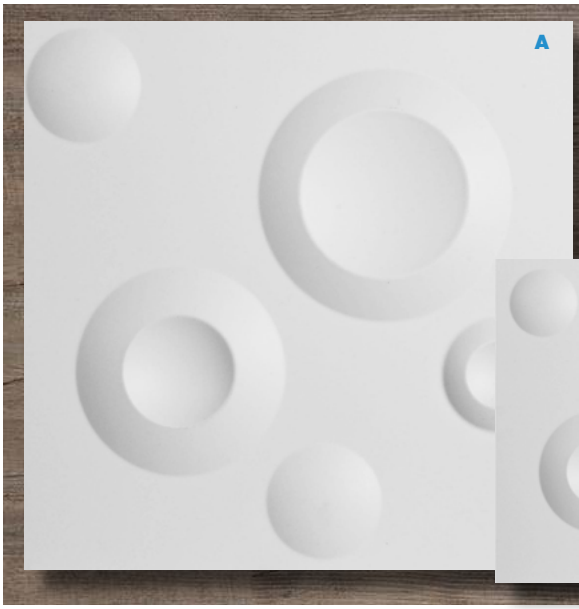

The durable PVC is waterproof, dent-resistant and lightweight making installation options limitless for both interior and exterior, residential and commercial applications. Especially created for spaces where moisture is an issue, they can stand up to any condition and aren't prone to peeling, warping or bubbling, making them virtually maintenance free. They were built for homes and community spaces where people move, explore and live life.

PVC ROSETTES& PLINTHBLOCKS

Upgrade your trim quickly and easily with professional looking results. Use our rosettes as a decorative addition with any window or doorway moulding and casing. Used as a transition piece or corner block, they are easy to install and eliminate the need to miter difficult angles on moulding.

Our rosettes are the perfect accent pieces to cabinetry, furniture, fireplace mantels, ceilings and more. Use them to draw attention away from the seams of moulding or enhance plain projects with our elegant designs. Available in multiple heights to match traditional and modern profiles.

PVC CONTEMPORARY CEILING MEDALLIONS

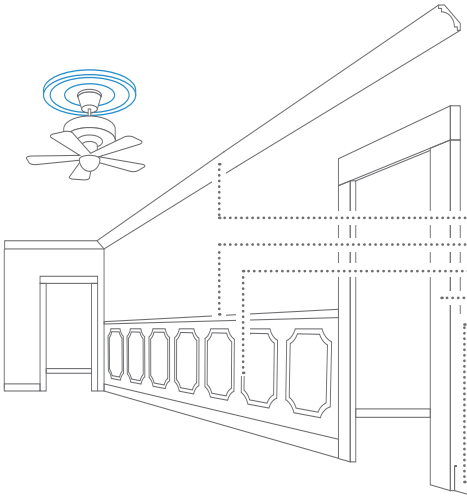

Ceiling medallions offer a great opportunity to upgrade a plain light fixture or ordinary ceiling space to an extraordinary focal point. These quick install and affordable additions come in a vast range of sizes, shapes, and styles. Our contemporary medallions are jewelry for the home. When paired with a ceiling ring or complimentary moulding, they compose a grand effect. Throw in a sparkling chandelier, modern pendant, or fun ceiling fan and the combination creates the perfect signature look.

With round, diamond, oval, square and rectangular designs, there is something for everyone's preference. Even dream up and inspire an original piece of wall art with creative applications. Why waste space with a dull fifth wall, when you can makeover your ceiling space into something more wonderful.

PVC PIERCED CEILING MEDALLIONS

Combining historical inspiration with modern technology, our faux iron designer medallions provide the look and feel of cast iron with greater versatility than metal. They are lightweight, custom-made, and easy-to-install. Perfect for most interior lighting decor solutions. Each medallion is hand-painted in a beautiful metallic finish that compliments any fixture or ceiling fan. The PVC material offers durable, interior or exterior application ability that will not rust or fade. Our medallions provide a sophisticated focal point and an affordable upgrade that make a huge impact. With modern, contemporary, and elegant design options available, there is something for everyone's taste. The lightweight material makes them perfect for wall decor too.

ARCHITECTURAL GRADE PVC

PVC millwork has produced a profound change in construction. As standards shifted to needing more durable lifetime products, we developed a vast line of standard PVC products, as well as an entire collection of custom PVC millwork. From small corbels to massive historical reproductions, the Architectural Grade PVC line is the perfect solution to your project's carpentry needs.

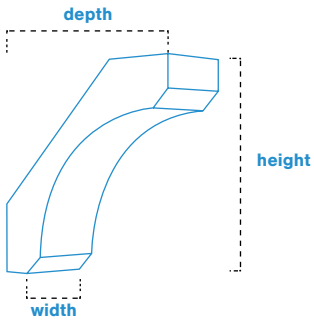

Innovative PVC manufacturing processes allow us to create one-of-a-kind products that would be difficult for traditional carpenters to replicate. While providing none of the negative aspect of wood; it can be cut, drilled, nailed, glued, and screwed just like wood, providing greater workability and fast installation.

DESIGN YOUR OWN

High-density PVC is perfect for pilasters because it looks, feels, installs, and paints just like traditional wood, plaster or cement pilasters. This broad product line is durable in harsh weather, resists insects and mold and doesn't splinter or rot and won't fade over time.

PVC

SURFACE MOUNT GABLE VENTS

Surface mount gable vents are easily installed for a quick upgrade that will add instant curb appeal. Available in functional vents with or without a metal screen and nonfunctional surface-mount vents for decorative applications only.

PVC has all the benefits of wood without the worry. Weather and insect resistant, PVC gable vents won't warp, rot, or deteriorate. Our PVC vents allow for lasting beauty for years to come. We offer a wide range of custom shapes and designs to accommodate any project need. Each gable vent is made-to-order for that signature style that will set your home apart from others.

SURFACEMOUNTGABLEVENTS

Surface-mount gable vents allow you to boost the aesthetic value of your home with minimal effort. PVC vents have the same crisp lines as wood, but also have flexiblity for curves, arches and sharp angles for a truly custom piece of art for the exterior of your home.

1. *CHOOSE A STYLE:* _____
2. *ENTER MEASUREMENTS:* *H:* ____ *W:* ____ *P:* ____
3. *CHOOSE AIR FLOW* *FUNCTIONAL or NON-FUNCTIONAL*

The decorative gable vent does not have a louver box. It is applied as a surface mount vent. This option is used when you don't have a need for ventilation, but you want to give your gable a nice finished look.

The functional gable vent does not have a louver box. This option has minimal opening under louvers to allow for some airflow.

CONSTRUCTION

- Made from a solid piece of PVC
- Available in Standard, Brickmould, and Brickmould w/sill
- Mounted to the exterior surface
- Add 7% for metal screen on funtional vents

WHERE TO BUY EKENA MILLWORK PRODUCTS

We have an extensive network of great dealers that both carry our products and let you special-order Ekena items that can then be shipped directly to the job site. Email or call us to find your local dealer.

Email: sales@ekenamillwork.com

Phone: 866-607-0435

ORDERING INFORMATION

HOW TO PLACE ORDERS

There are three basic ways to place the order:

PHONE	FAX	EMAIL
Call (866) 607-0453 to place your order over the phone. Make sure to reference your customer account number.	Fax your Purchase Order (PO) to (866) 591-3143 and put it Attn: Order Processing. Your order will be processed within 24 hours.	You may email your Purchase Order (PO) to orders@ekenamillwork.com.

NOTE: Please include the following information on all purchase orders faxed or emailed:

- Ship-to Address
- Contact telephone number for job site delivery
- Billing Address
- Item part numbers
- Item quantities
- Special instructions

SHIPPING INFORMATION

LEAD TIMES

All standard products are available to ship within 24-72 hours. We deeply inventory all of our products - our goal is to never run out of anything. If you need an order to ship the same day, that is very possible - but you need to call us now!

HOW MUCH IS SHIPPING?

$20 flat rate. Unless the product has this common carrier logo -  SHIPS COMMON CARRIER

IS THERE A MINIMUM ORDER SIZE?

Nope. Order whatever you want.

DELIVERY INFORMATION

RECEIVING SCHEDULES

Most often common carrier rules and regulations require that orders be delivered during "Normal Business Hours." This generally means between 8:00AM to 5:00PM, but could vary depending in the community or the freight company. If the delivery is arbitrarily refused during these normal working hours, an additional charge may be inflicted by the carrier.

ACCEPTANCE AND RECEIPT OF GOODS

Many of our orders ship UPS or FedEx, but when the order is large, or contains a large item, then it must ship via Common Carrier. When shipping on a carrier truck, please follow the guidelines on the next page.

WHILE THE DRIVER IS PRESENT:

1. Check the driver's delivery receipt and/or Bill of Lading (BOL)

a. Is the shipment/order yours?
b. Is all the necessary information or documentation present? (i.e. PO numbers, job name specified, deliver terms, number of items, etc.)

2. Count your freight

Inspect all packages. Make sure that every product you ordered is accounted for and present.

3. Is there any damage?

It is very important that you confirm the product is received undamaged, from shipment, and is the correct item. To do so, please examine the shipping box and all contents immediately upon receipt for any signs of damage, wrong item(s) or defective product(s). All damaged or incorrect items must be noted on the BOL in driver's presence.

4. Signing the BOL/Delivery Receipt

By signing the BOL and not noting any damaged or missing/incorrect items, the customer is agreeing that the order arrived in perfect condition and was fulfilled correctly. In the event of concealed damage, the customer is responsible.

5. Freight claims

All claims must be initiated within 72 hours of delivery.

CANCELLATIONS AND RETURN POLICY

CANCELLATIONS

1. Custom Orders
    a. "Custom" manufactured orders can be canceled for up to 24 hours after the order is placed. After 24 hours, the order cannot be canceled.

    b. Customers will be charged the full product price for "custom" manufactured orders that are canceled after 24 hours.

2. Stock Items
    a. Orders placed for standard catalog products or "stocked items" can be canceled or adjusted within 24 hours after receipt of order.

    b. An order that is canceled and/or refused after the order has shipped will be charged a 20% restocking charge along with all applicable "to and from" freight costs and charges associated with the canceled order.

RETURNS

1. All requests for product returns must be approved and receive a designated RGA (Return Goods Authorization) number associated with the order by an authorized Ekena Millwork Customer Service Representative.

2. RGA numbers are only good for 21 days after date of issue. No returns will be accepted or received after the 21 days after the RGA number has been issued.

3. Orders must be approved for return within 60 days of original shipment.

4. All returns that are approved with a designated RGA number are subject to a minimum 20% re-stocking fee. Customer is responsible for all freight charges associated with returning an approved order.

5. Customer "credit" will be issued only after the product has been received back into inventory, all items are accounted for as specified on the RGA, and the items are in re-sellable condition. Any damaged product received back will not be credited and all associated re-stocking charges may apply. Payment deductions against RGA's are not allowed without an authorized "credit memo" from Ekena® Millwork.

6. Customer "credit" will be issued within 1 week of receiving the returned goods in acceptable condition, less:
    a. Re-stocking charge
    b. Freight charges (if applicable)
    c. Damages, concealed shortages or discrepancies

pvc.
all you need to know

GENERAL KNOWLEDGE

- PVC cannot be used as a structural product in load-bearing applications. Many PVC products will need to be supported by wood or other structural materials.
- Temperature variations will cause PVC mouldings to expand and contract.
- Architectural PVC products can be used both interior and exterior.
- PVC products can be installed anywhere where the temperatures do not exceed 140°F to 150°F.
- PVC products are water proof and will not promote the growth of mold or mildew, allowing them to be installed in wet conditions.

TESTING RESULTS

CARE & MAINTENANCE

Glass cleaner has been shown to be the best at cleaning Architectural PVC products, but several commonly-used household cleaners work as well. Avoid harsh cleaning products. Test out the cleaner on a small portion of the product prior to cleaning the entire product with an untested cleaner.

installation tips

SAWING & CUTTING

- Standard woodworking equipment can be used for most applications.
- A carbide-toothed blade (80 teeth or more) is recommended if using a power miter saw.

FASTENING & GLUING

- Mechanical fasteners are always required (nails or screws). Fasteners should be placed between ¾ and 2" from edge of product.
- 6d and 8d galvanized nails work well
- If installing in temperatures 40°F or below, pre-drilling is required.
- A pneumatic nailer with rubber bumpers can be used. Air pressure should be adjusted based on the gun, temperature, and substrate (80-100 psi is typical).
- Fasteners should penetrate at least 1 ½" into substrate.
- DO NOT USE staples, small brads, or wire nails.
- Allowing room for expansion and contraction is always wise, but when using adhesive, there are several manufacturers that have special adhesive and caulking specifically for expanded cellular PVC products. OSI, DAP, and Liquid Nails are some reliable adhesive manufacturers.

FILLING HOLES & TOUCH UP

After installation is complete, use any of the following products to fill any gaps or nail holes.

- Dap® "All Purpose" Painter's Putty®
- Minwax High Performance Wood Filler
- Elmer's Fill-N-Finish Light Wood Filler
- Sherwin-Williams Shrink Free Spackling

PAINTING

Architectural PVC products do not need to be painted, but is recommended to enhance product details and help maintain a consistent color. If you choose to paint, we suggest 100% acrylic latex paint designed for trim with a light reflective value (LRV) of 57 or higher. If the color you choose has an LRV lower than 57, we suggest using Sherwin-Williams VinylSafe® Technology, which is a pigment package that can be used with several of their paint products.

URETHANE MILLWORK FAQS

How are urethane products made?
Polyurethane is formed when two chemicals react creating a foam-like structure. When this reaction occurs in one of product pre-primed molds, the urethane foams, expands to the desired shape, and hardens. This reaction creates tremendous heat, causing the primer on the mold to fuse to the material, forming a hard, outer shell. A high-density product with crisp detail is then released from the mold.

Will these products melt in high temperatures?
All products, including wood and steel, will melt if the temperature is hot enough. However, urethane products will not melt under normal use conditions.

What types of special skills are needed to install urethane products?
None. If you can install wood products, you can easily install urethane products. They can be nailed, cut and sanded just like wood products.

Are special supplies needed to install polyurethane products?
Yes. We recommend using noncorrosive fasteners along with polyurethane compatible adhesive. The adhesive is recommended to place between decorative joints and to secure any piece to the wall along with mechanical fasteners.

What are some general tips about installing urethane products?
Never install products with fasteners only. For best results, always use noncorrosive fasteners along with polyurethane compatible adhesive on the back and at all decorative joints.

What types of weather conditions are necessary to install exterior urethane products?
For exterior applications, urethane products can be installed in any temperature, hot or cold, and in any kind of weather.

What type of maintenance is needed to keep urethane products looking good?
Very little, if painted with recommended quality exterior-grade latex paint. All urethane products are low maintenance millwork goods, making them ideal for both interior and exterior applications.

Will the product ever become infested with insects?
No, urethane products are not a source of food for insects as it is not made from wood.

Are urethane products affected by moisture?
No. Urethane does not absorb water as it is a closed-cell material. This closed-cell structure will prevent water absorption.

Why or how do people use urethane millwork?
Urethane is lightweight and easy to install, making it a top selection of both building professionals and consumers. Lightweight for quick and easy installation. Solid urethane offers maximum durability and minimal upkeep with sharp design clarity and high quality, pattern options. It can be cut, drilled, glued or screwed with common tools and comes factory primed and ready for paint or faux finish. Best of all it is resistant to moisture, insects, and peeling or splitting.

URETHANE MILLWORK FAQS

Do all urethane products come painted and ready to install?
The pre-primed surface is ready to stain or paint. Urethane products need to be painted. We recommend painting the product before installation and touching it up after installation is completed. Exterior product must be painted with an exterior grade 100% acrylic latex paint.

What kind of paint do I use after installation?
100% acrylic latex paint. Since all polyurethane products are subject to thermal expansion and contraction, it is recommended that consideration to lighter paints be selected in your choice of colors, as darker colors absorb more radiation from the sun than lighter colors. Flat, eggshell and satin finishes are recommended due to their slight porous nature during the curing process.

What are its best uses for the building industry?
Due to the ability to mold the material, decorative trims with detailed designs are easy to produce. Large moulding profiles can be made from one piece of urethane, instead of layering wood to create the same look. This saves on labor and time.

How do I prevent UV fading/deterioration?
UV rays do not affect properly finished product. Exterior product must be painted with an exterior grade 100% acrylic latex paint.

Anything special I should know about storing urethane products?
These products can be stored either inside or outside, but not in extreme heat. Products should be stored as it is intended to be installed. For optimum use, polyurethane compatible adhesive should be stored at room temperature until ready to use. Acclimate urethane products before installation up to 10 hours.

What are the recommended fastening procedures for urethane?
Please see installation instructions for part specific recommended fastening procedures. Note that products should never be installed with fasteners that are susceptible to corrosion, and proper use of glue and adhesives is crucial for correct installation.

Are your urethane products just decorative?
Polyurethane products are most commonly used for decorative purposes as the material by itself is non-structural. Even so, many polyurethane items do serve a functional purpose, like gable vents that help with attic ventilation or ceiling medallions that cover unsightly holes in the ceiling.

ARCHITECTURAL PVC FAQS

What is PVC?
Each piece of Cellular PVC is made of stable high-density PVC that won't rot, split or chip, and doesn't absorb water. PVC has a closed cell nature, so water cannot penetrate the product and it resists all forms of insect infestations, mold and mildew.

What types of special skills are needed to install PVC products?
None. If you can install wood products, you can easily install PVC products. They can be nailed, cut and sanded just like wood products.

Are special tools or supplies needed to install PVC products?
Hot-dipped galvanized or stainless-steel nails/screws are recommended for PVC products. For cutting, we recommend using carbide-tipped blades with as few teeth as possible and have plenty of support on both sides of your cutting station when trimming or cutting a product.

What are some general tips about installing PVC products?
Never install products with fasteners only. For best results, use along with PVC compatible adhesive on the back and at all joints. If nailing product at 40°F or below, predrilling is recommended. For concrete/masonry/brick installation apply masonry adhesive sealant (following manufacturer's instructions) to the installation surface first, then laying trim and securing with masonry fasteners.

Can I clean PVC products?
For normal cleanup regular household cleaners such as Soft Scrub or Spic & Span can be used. Be careful in handling and keep the material covered to protect it from dirt and debris.

Are PVC products affected by moisture?
No. PVC does not absorb water as it is a closed-cell material. This closed-cell structure will prevent water absorption, making it perfect to install in bathrooms, kitchens, laundry rooms or outdoors.

Why or how do people use PVC millwork?
PVC is lightweight and easy to install, making it a top selection of both building professionals and consumers for exterior or interior applications. PVC offers maximum durability and minimal upkeep with a sharp design clarity and high-resolution quality, with endless custom pattern options. It offers the appearance and workability of wood, yet it is resistant to insects, weathering, moisture, and mildew. It will not split, rot, or deteriorate.

Where do I use PVC?
Interior or exterior applications up to 180° temperature. It is suitable for ground and masonry contact.

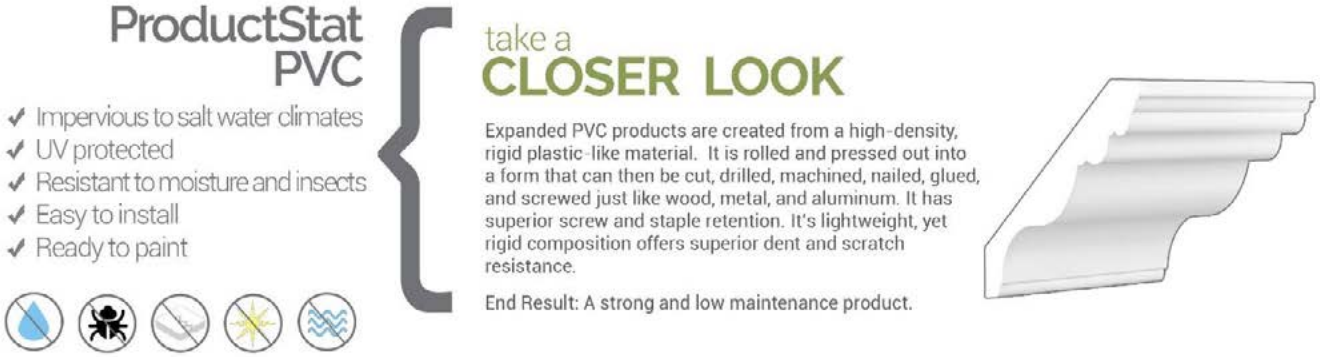

Does PVC expand and contract?
Yes, but allowing it to acclimate to temperature before installing and using our installation method mitigates movement. In temperatures above 80°F, the board joints should be tight. In temperatures of 40°F to 60°F, leave 1/8 inch of space. For less than 40°F provide for 3/16 inch between boards.

What type of caulk can I use with PVC?
You can use an acrylic, urethane, or polyurethane caulk with PVC.

What are its best uses for the building industry?
Due to the workability of the material it is easily milled, cut and built to custom specifications. Decorative trims with detailed designs are quick and easy to produce and with so many variations of sizes, shapes and products, custom PVC products can save time and money.

Anything special I should know about storing PVC products?
These products can be stored on a flat, level surface either inside or outside, but not in extreme heat or cold. Products should be stored as it is intended to be installed. Acclimate PVC products before installation up to 10 hours.

ARCHITECTURAL PVC FAQS

What paint can I use on PVC?
If you choose to paint, use 100% acrylic latex paint with an LRV of 55 or higher. Definition of LRV (Light Reflective Value): LRV is the amount of light reflected from a painted surface. Black has a reflectance value of Zero (0) and absorbs all light and heat. White has a reflectance value of nearly 100 and keeps a building light and cool. All colors fit between these two extremes. Light Reflective Values are given as a percentage. For example, a color with a LRV of 55 means it will reflect 55% of the light that falls on it. For darker colors (LRV of 54 of lower) use paints with heat reflective characteristics specifically formulated for use on vinyl/PVC products. These paints/coatings are designed to reduce excessive heat gain. WARNING: It is recommended that should you choose to paint a darker color (LRV of 54 or lower) all aforementioned installation steps should be followed. Please refer to the painting section in our Trim Installation Guidelines.

What type of fasteners should be used to install PVC?
You will want to use the same fasteners you would use for installing wood trim and siding. They should be stainless steel or hot dipped galvanized and long enough to penetrate the substrate a minimum of 1-1/2". For best results, use fasteners designed for wood trim and wood siding. These fasteners have a thinner shank, blunt point, and full round head. Standard nail guns work well with PVC. If using pneumatic tools, use a fastener with a full round head and set the pressure so the fastener goes just beneath the surface of the board. IMPORTANT: Staples, brads, and wire nails should never be used. These products have shanks that are too small in diameter to control the thermal expansion and contraction properties of PVC. For a finished look the Cortex fastening system can be used to reduce the need to field apply paint when the trim is going to be left white.

Can PVC trim be used in structural application?
No, PVC cannot be used in structural applications. WARNING: PVC trim products cannot be used in any stress or structural applications. PVC products can only be used as the decorative part of your application; either wood or metal structural components need to be incorporated for structural applications. Check with your architect or builder if your application is structural.

What products are available in PVC?
Corbels, braces, brackets, outlookers, gable brackets and gable pediments, rafter tails, gable vents, arch and flat trim, decorative running trim, ceiling medallions, panels, moulding, columns, pilasters, pediments, shutters, and more.
We also specialize in custom orders for hard-to-find products.

Ekena Millwork Polyurethane

1.1 Product Description

1.1.1	Ekena Millwork® Urethane products are made with high density polyurethane with an overall density similar to white pine at 13 to 17 pounds per cubic foot. The Ekena urethane process provides a greater skin density than core density for increased durability.
1.1.2	All products are manufactured with a white or semi-white color coating. Further, these products receive a primer coat finish before they are shipped to customers. The combination of the integral shell-like skin, the barrier coat, and the primer top coat provide an excellent substrate for durable finishes.
1.1.3	Ultra violet rays do not affect properly coated products.
1.1.4	The compressive strength of polyurethane products falls within the 300-400 P.S.I. range. (The parts are not intended for structural use).
1.1.5	The tensile strength of polyurethane products falls within the 350-400 P.S.I. range. (The parts are not intended for structural use.)
1.1.6	The degree of flexibility of any given polyurethane product is determined by the size and shape of its cross section.
1.1.7	Ekena urethane has a closed cell structure which provides protection from most solvents and renders it almost completely hydrophobic. It will not rot.
1.1.8	All Ekena urethane products resist the growth of mildew and fungus and further provide no nutritional value for other organisms such as small rodents.

1.2 Submittals

1.2.1	Submit Ekena urethane product data and shop drawings for customer approval.

Ekena Millwork® Thermoformed PVC Millwork General Information & Limited Lifetime Warranty

Ekena Millwork® warrants its line of PVC products including those listed below, as follows:

Ekena Millwork® warrants to the owner of a property on which any of the above products have been installed that they are free from manufacturing defects which result in cracking, splitting, and excessive fading under normal weather conditions for a lifetime.This warranty is subject to the following limitations:

1. The warranted product must have been installed in accordance with the manufacturer's installation instructions. Products not installed in this manner will not be warranted.

2. Ekena Millwork® shall solely determine whether the product was installed according to its installation instructions.

3. In the case of a claim of excessive fading, the homeowner is advised that some degree of fading over time is expected. Therefore, Ekena Millwork® shall solely determine whether the amount of fading in any particular case is excessive. Ekena Millwork® will not be held responsible for fading, peeling, cracking or any other deterioration of finishes applied by any third parties.

4. The owner shall have the burden of establishing to Ekena Millwork's reasonable satisfaction the date of purchase of the product on which a claim is made.

5. In the event of a claim during the warranty period, Ekena Millwork® at its sole option will either (a) repair or replace the warranted product(s) without charge to the owner, or (b) if Ekena Millwork® is unable to repair the product in a commercially reasonable fashion and if Ekena Millwork® is unable to replace the product (for example, because it has been discontinued), or notwithstanding that the product may be repaired or replaced, the homeowner nevertheless chooses to accept a refund, Ekena Millwork® will refund to the homeowner a sum equal to the actual price paid for the product at the time of purchase less reasonable depreciation from the date of purchase, which shall be determined as outlined above, to the date of the claim.

6. This warranty excludes reasonable travel expenses and labor charges incurred by Ekena Millwork® and/or its contractors in removing and/or replacing a warranted product.

7. If Ekena Millwork® attempts a reasonable number of times to repair a defective product under this warranty but those attempts are unsuccessful, Ekena Millwork® at its option may either replace the product or pay a refund to the homeowner as provided above.

8. This warranty will not cover claims for the following (a) damage to or failure of a warranted product resulting from acts of the owner or the installer, (b) damage to or failure of the product resulting from unreasonable use or the failure to reasonably maintain the product after the date of purchase.

9. THE PROVISIONS OF THIS WARRANTY ARE IN LIEU OF ANY OTHER WARRANTY EXPRESS OR IMPLIED INCLUDING SPECIFICALLY, BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

10. THE OBLIGATIONS AND LIABILITIES OF EKENA MILLWORK® UNDER THIS WARRANTY OR UNDER ANY IMPLIED WARRANTY WHICH IS APPLICABLE DESPITE THE PRECEDING DISCLAIMER ARE IN LIEU OF ALL OTHER OBLIGATIONS OR LIABILITIES INCLUDING, WITHOUT LIMITATION, LIABILITY FOR INCIDENTAL, CONSEQUENTIAL AND/OR ANY OTHER DAMAGES BASED UPON ANY THEORY OF RECOVERY AT LAW OR IN EQUITY INCLUDING SPECIFICALLY ANY THEORY OF NEGLIGENCE, BREACH OF CONTRACT, BREACH OF WARRANTY, OR STRICT LIABILITY.

Any claim under this warranty must be made in writing and postmarked within 30 days after discovery of the defect to:
Ekena Millwork
2300 West Main St.
Clarksville, TX 75426

Ekena Millwork® must be allowed a reasonable opportunity to determine and fulfill its obligations under this warranty before the homeowner or others make any repairs. The homeowner's failure to abide by the terms of this provision shall void any responsibility of Ekena Millwork® to pay for repairs or other work done by third parties.

Ekena Millwork® Urethane Millwork General Information & Limited Lifetime Warranty

Before you use or install any Ekena urethane products, please review the information below. Ekena urethane products:

- Should be used for decorative applications only (unless clearly stated otherwise in catalog)
- Are very easy to repair. With the use of wood filler or automotive bondo/filler, dents or gashes of any size can be quickly filled.
- Will resist the natural elements, except for direct sunlight to the unpainted yellow/tan underside of the millwork. Urethane products must be properly painted within 30 days of installation. We recommend painting the product before installation and touching it up after installation is completed. Exterior products must be painted with an exterior grade 100% acrylic latex paint.
- It is important to fill damaged or cut surfaces within a few days.
- Can withstand temperatures of about 140°F. However, the items should never be placed in an area subject to solar temperature building, such as behind a storm door or similar application.
- Should never be installed with mechanical fasteners only. Best installation requires non-corrosive fasteners along with urethane base PL Premium Adhesive.
- Should not be stored in extreme heat. Ekena urethane products should be acclimated for two days prior to installation.
- May require altered installation procedures to meet local specifications. Please check local building codes prior to installing.

Ekena Millwork Urethane Millwork Limited Lifetime Warranty

Ekena Millwork provides a LIFETIME WARRANTY to the original purchaser of our line of urethane millwork. This LIFETIME WARRANTY provides that the urethane material will be free from manufacturer defects in material and workmanship under approved normal use.

If a defect is discovered in an Ekena urethane product and the above conditions have been met, the customer should notify us in writing within thirty (30) days of discovering the said defect. The customer may be required to return the product to Ekena Millwork for evaluation. Ekena will then review the product and installation methods, and determine if replacement, repair, or refund is appropriate. This warranty does not cover or include labor, transportation costs, or any other expenses incurred in connection with the purchase, use, or installation of the item(s). Replacements, repairs, or refunds are the only options under this limited warranty.

Ekena defines seacoast as within three (3) miles from a coastal seashore. If you live in a seacoast environment, the warranty coverage is different for certain product components due to environmental factors, such as salt spray and other abrasive materials. Additional maintenance is required in a seacoast environment.

This limited warranty does not cover damage from the result of mishandling in transportation, acts of God, customer modifications, vandalism, misuse, abuse, improper maintenance, unreasonable care, or other causes that did not arise from manufacturer defects in workmanship and/or materials. No person, retailer, sales rep, dealer, service facility, or entity of any type is authorized to change, modify, or amend the terms of this limited warranty in any manner. Ekena shall not be liable to the customer or to any other entity for any incidental or consequential damages or loss of profit from any defect in any items.

Ekena Millwork® PVC Millwork General Information & Limited Lifetime Warranty

Terms: Subject to the terms and conditions of this Warranty, Ekena Millwork (herein Ekena) warrants to the Homeowner that PVC products are free from manufacturing defects in material and workmanship if installed according to our installation instructions, and will not rot, peel, flake, corrode, blister, split, chip, fade excessively or fade unevenly when exposed evenly. While you own your home, this Warranty will remain in effect for your lifetime. This warranty is not transferrable. Ekena reserves the right to discontinue, modify or otherwise alter any of its products, including color, without prior notice. This Warranty is made exclusively and specifically to the person(s) who both owns and continuously resides in the home on which the products are installed (herein "Homeowner") if that person is the original purchaser of Ekena's product(s) covered under this warranty. This warranty is also made to a Homeowner who purchases a newly constructed residence on which the product is installed directly from the builder. Where Ekena's product(s) are installed on a structure (i) not occupied exclusively by the Homeowner (including his or her immediate family), (ii) used for income producing purposes, or (iii) used in a public or semi-public application, such as (but not limited to) a condominium, apartment building, house of worship, school, medical facility, senior living facility, government building, hotel, etc., then the warranty is made solely to the original owner of the structure ("Commercial Owner") and is not transferrable.

The term of the Commercial Owner's warranty is 50 years, prorated below. If Ekena determines that its product(s) have a manufacturing defect covered under the Terms of this Warranty, Ekena will at its option, either (1) refund the purchase price of the material, or (2) replace any product it determines has a manufacturing defect. In no event shall Ekena be responsible for any labor charges. In the event of repair, replacement, refinishing or coating, the warranty applicable to the original product(s) shall apply to the repaired, replaced, refinished or coated product and will extend for the balance of the original term of the warranty period. These remedies are the sole remedies for any defect of the product.

Normal Weathering is defined as exposure to ultraviolet sun light and extremes of weather and atmosphere, which will cause any colored or painted surface to fade, darken, chalk or acquire a surface accumulation of dirt or stains. The severity of these conditions depends on air quality, the geographic location of the property and other local conditions over which Ekena has no control. Ekena shall determine, at its discretion, whether the siding is suffering from normal weathering (which is not covered by warranty). This conclusion shall be based on whether the product(s) evidences a change in color in excess of the Hunter Units as calculated according to ASTM D2244, as outlined in the chart herein. Product(s) must have been exposed to the same weathering conditions and not partially covered by other materials such as shutters, awnings, porticos or other materials.

THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, LIABILITIES OR OBLIGATIONS OF EKENA, EITHER EXPRESSED OR IMPLIED, EXCEPT THAT THE DURATION OF ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN TIME TO THE DURATION OF THIS WARRANTY. EKENA SHALL IN NO EVENT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL OR SPECIAL DAMAGES OF ANY KIND. YOUR EXCLUSIVE REMEDY SHALL BE ENFORCEMENT OF THIS WARRANTY UPON THE TERMS AND CONDITIONS HERIN CONTAINED. NO REPRESENTATIVE OF EKENA OR ITS DISTRIBUTORS OR DEALERS IS AUTHORIZED TO MAKE ANY CHANGE OR MODIFICAITON TO THIS WARRANTY.

Some States do not allow limitations on how long an implied warranty lasts, so the foregoing limitation may not apply to you.

Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Ekena Millwork PVC Millwork Limited Lifetime Warranty

Ekena Millwork provides a LIFETIME WARRANTY to the original purchaser of our line of PVC millwork. This LIFETIME WARRANTY provides that the PVC material will be free from manufacturer defects in material and workmanship under approved normal use.

Ekena's warranty covers only manufacturing defects identified above. This warranty does not cover damage caused by other factors, including but not limited to: normal weathering (defined below), misuse, negligence or improper installation, failure to provide reasonable maintenance to prevent accumulation of dirt, mildew, staining materials, pollution, exposure to chemical products or incompatible cleaners, alterations like applying incompatible coatings, stains or varnishes (see technical information for compatible coatings if any), improper handling or storage, defects in the wall structure (materials or construction) on which Ekena's products are installed which cause failure, such as movement, cracking or settling of the wall, foundation or building, deformation caused by high heat sources including but not limited to grills, fire pits, foil sheathing, low e-glass windows and low e-glass doors, damage caused by animals or insects, impact of foreign objects, hail, lightning, fire, hurricane, tornadoes, or other Acts of God, vandalism, intentional damage, riot or insurrection.

The claimant must provide date of installation and proof of property ownership. The claimant may be required to submit a sample of the defective materials for analysis. This sample may need to be removed from the property at the property owner's expense. Ekena will analyze the material claimed to be defective and determine the validity of the claim.

Any claim under this warranty must be made in writing and postmarked within 30 days after discovery of the defect to:
Ekena Millwork
2300 West Main St.
Clarksville, TX 75426

Ekena Millwork® must be allowed a reasonable opportunity to determine and fulfill its obligations under this warranty before the homeowner or others make any repairs. The homeowner's failure to abide by the terms of this provision shall void any responsibility of Ekena Millwork® to pay for repairs or other work done by third parties.
