

MORE FUN WITH YOUR MICROSCOPE!

1

PART 1: EXPLORE THE WORLD.

Your microscope isn't just for skin! Use it to look at all sorts of materials, like the fibers in your clothing. Silk, wool and cotton will all look different. Try examining on your shirt, your jacket and your pants. What differences do you see?

PART 2: PLAY WITH MAGNIFICATION.

Comb your fingers through your hair. Once you've found a loose hair, look at it under the microscope. Do you see some spots that look particularly shiny? Zoom in on different areas, like the root and the ends. What differences do you see?
