Application

C-108/208 Hot & Cold Wall Hydrant

Vertical or Horizontal Installation

C-208 Loose Key Design

- Residential
- Freezeless
- Anti-Siphon
- Hot & Cold Mixing

DIAMOND Series

PRIER C-108 provides a year round source of tempered water to areas of structures that are subject to freezing temperatures. The hydrant valve is connected to the supply piping in the heated portion of the structure, eliminating the possibility of freezing. The hot side is loose key operated to prevent unauthorized operation. Unique to its patented design, the same product is available as horizontal or vertical. Ordering the C-208 gives you the same style hydrant but with vandal proof extended lockshields with operating key on both hot and cold stems.

The PRIER C-108 has all the characteristics of the historically proven C-134 with the added protection of a self-draining anti-siphon vacuum breaker and backflow check valve. It is available from stock in lengths from close coupled to 24", longer sizes are available on request.

Features

- Horizontal or vertical installation with same product
