

## Thermwire®-Wrap

Thermwire®-Wrap stops frozen pipes cold!

Apply it anywhere pipes are subject to  
below-freezing temperatures.

- Use it on plastic or metal pipes up to 8 inches in diameter.
- Water, Wastewater and HVAC Piping.
- Heat output of 3 Watts/ft. or 6 Watts/ft.
- 200 ft. circuit lengths for 120 Volt cable.
- 350 ft. circuit lengths for 240 Volt cable.
- Available in 50ft. and 250ft. reels and 100ft. E-Z Paks.

### Construction

- 16 AWG Buss Wires
- Self-Regulating Conductive Core
- Insulating Jacket
- Metallic Braid

### Applications

- Metal or Plastic Pipes (up to 8" diameter)
- Dry Environments

NOTE: TW-3 is UL Listed for metal and plastic pipes; TW-6 is UL Listed for metal pipes only. Insulation must remain dry for insulation to be effective in pipe freeze protection applications.
