| 8" IPS | 4525111 | 4525211 | 4525141 |

Installation

The plastic wall plates may be installed by two methods.

1. Place the wall plate over the pipe while the pipe is being installed.
2. Split the wall plate at the area on the back of the wall plates that has been molded to break apart.
 Carefully bend the wall plate at this weakened area until fully separated.
 Then carefully twist the wall plate open just enough to be placed around the pipe.
 Allow the two ends of the separated wall plate to "spring" back into shape.
 Slide the wall plate up against the base material to finish the installation.

These wall plates should not be painted. Certain chemicals contained in paint may cause the wall plates to deteriorate.
