

Plastic (ABS) with Chain

Description

Plastic hose valve caps are intended to be used in place of brass or bronze caps. Because of the plastic materials low scrap value, theft and vandalism are significantly reduced. Both size caps feature rocker lug design and provided with an attaching chain. Caps are also gasketed to resist moisture loss due to a leaky valve.

Installation

Make sure valve threads are free from debris. Thread correct size cap onto the valve until tight. Attached to chain to the valve body at the point provided by the valve manufacturer.

CAUTION: PLASTIC HOSE VALVE CAPS ARE FOR PROTECTION OF THE THREADED MALE THREAD ONLY. DO NOT PRESSURIZE PLASTIC HOSE VALVE CAPS. SERIOUS BODILY INJURY CAN OCCUR.

Specifications

Materials:

Cap: Injection Molded ABS
Gasket: Black NBR

Chain & Screw:

Brass or low grade steel with brass like finish

Sizes:

2½" NST
1½" NST

Color:

Red
