

Vinyl End Caps and Frame Caps

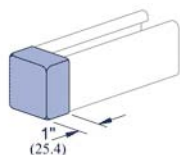

Unistrut Metal Framing "End Caps" and "Frame Caps" can be used when a smooth, finished channel end is desired. These caps are molded from a specially formulated vinyl that can be used in temperatures up to 300 degrees without degradation. Unistrut End Caps and Frame Caps provide a snug fit and will not crack or peel when stretched or scratched by sharp metal channel edges.

Unistrut End Caps are only available in white, while Unistrut Frame Caps are available in black, green, white, gray, brown, blue, orange, red and yellow. The chart below should be used for ordering Unistrut Metal Framing End and Frame caps.
