

SW *Splash Catcher*[®] BACK PANELS

Avoid complaints about damaged
or deteriorating wallboard.

Add "BP" to your mop sink specifications.

STERN-WILLIAMS
Stainless Steel panels
cover the critical
12 inches of wallboard
just above the mop sink.

The unfinished wallboard being used
in maintenance closets today
cannot withstand the conditions
that exist there. But you can
prevent problems before they begin.

TO SPECIFY:

Add suffix "BP" to the Stern-Williams
model number, along with the number of
walls. For example, Corlow corner model
with front drop is "SBC-1700-BP-2"

Panel material is type 304, 20-gauge
Stainless Steel, meeting Commercial
Standard CS-243-62.

1. Channel water into the mop sink, protecting the face of the wallboard against splashing, and protecting the raw lower edge against seepage.
2. Cover and protect the seam-taped corners, preventing loosening and curling of seam tape.
3. Protect wallboard against the impact of equipment and the carelessness of maintenance workers.

Stern-Williams is your most complete source for mop sinks and accessories.

We produce mop sinks. We help you avoid problems.
